Code	33266
Name	History of modern philosophy I
Cycle	Grade
ECTS Credits	6.0
Academic year	2023 - 2024

Study (s)

Degree	Center	Acad. year	Period
1004 - Degree in Philosophy	Faculty of Philosophy and Educational Sciences	3	First term
1012 - Degree in Philosophy	Faculty of Philosophy and Educational Sciences	3	First term

Subject-matter

Degree	Subject-matter	Character
1004 - Degree in Philosophy	15 - History of philosophy and current trends in philosophy	Obligatory
1012 - Degree in Philosophy	14 - History of philosophy and current trends in philosophy	Obligatory

Coordination

Name	Department
RAMOS VALERA, MANUEL	359 - Philosophy
SOLER ALVAREZ, FERNANDO	359 - Philosophy

SUMMARY

By virtue of the identity of its historical and thematic scope, we jointly program the subject History of Modern Philosophy I and the subject History of Modern Philosophy II.

The content of both is structured in several thematic blocks that collect in sequence fundamental stages and substantive problems in the history of modern philosophy, from its origin to its culmination.

The content of the subject History of Philosophy I is divided into three thematic sections:

- Philosophy of the Renaissance and principles of modern thought.
- European rationalism.
- British empiricism.

The content of the subject History of Philosophy II is divided into two thematic areas:

- The European Enlightenment.
- The transcendental idealism of I. Kant.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Por lo que hace a los conocimientos y habilidades, el nivel básico deseable para los estudiantes que cursen la asignatura es el proporcionado tanto por las materias del área de Filosofía cursadas durante el Bachillerato, como por las de Introducción a la Filosofía, la Historia de la Filosofía antigua I y II y la Historia de la Filosofía Medieval del Grado de Filosofía.

OUTCOMES

1004 - Degree in Philosophy

- Capacidad de comunicación profesional oral y escrita en las lenguas propias de la Universitat de València.
- Be able to communicate in a foreign language.
- Be able to obtain information from different primary and secondary sources.
- Be able to analyse, synthesise and interpret relevant cultural, social, political, ethical or scientific data, and to make reflective judgements about them from a non-androcentric perspective.
- Be able to organise and plan work times.
- Acquire the capacity to pose and solve problems, as well as to make decisions, in a limited time.
- Be able to convey information, ideas, problems and solutions to others (experts or not).
- Be able to improve and develop professionally.
- Be competent in the philosophical study of particular areas of research and human praxis, such as mind, knowledge, language, technology, science, society, culture, ethics, politics, law, religion, literature, arts and aesthetics, avoiding androcentric biases.

- Acquire a basic knowledge of the problems, texts and methods that philosophy has developed throughout its history and recognise possible androcentric biases.
- Be familiar with the ideas and arguments of the main philosophers and thinkers, extracted from their texts, and with the investigation of their traditions and schools, identifying the possible androcentric biases.
- Use and rigorously analyse specialised philosophical terminology.
- Identify the fundamental issues that underlie any type of debate.
- Relate problems, ideas, schools and traditions.
- Be able to apply the knowledge acquired to clarify or solve certain problems outside one's own field of knowledge.
- Expresar con precisión los resultados del análisis de problemas controvertidos y complejos.
- Identify and evaluate clearly and rigorously the arguments presented either in texts or orally.
- Be agile and efficient managing various sources of information: bibliographical, electronic and others.
- Acquire the learning skills needed to undertake further studies with an increasing degree of autonomy.
- Work with an increasing degree of self-motivation and self-demand.
- Appreciate autonomy and independence of judgement.
- Recognise human fallibility.
- View original and creative thinking positively.
- Be able to take on social and ethical commitments.
- Recognise plurality and respect differences.

LEARNING OUTCOMES

- 1.- Introduce the students in the context of genesis and development of modern Philosophical thought western.
- 2.- To make known the main texts, authors, theories and currents of modern philosophy.
- 3.- Work directly on some of the most significant philosophical sources of this period and be able to understand, interpret and critically analyze them.
- 4.- Discover the main philosophical problems that arose during this time, and relate them to the main events and characteristics of their time.
- 5.- Help the student to acquire the hermeneutical keys from which to interpret the most important texts of modern philosophy.

6.-That the student can reflect on the training process in which he is and orient himself in his professional future, based on elements provided by the subject.

DESCRIPTION OF CONTENTS

1. Philosophy of the Renaissance and principles of modern thought.

1. The philosophy of the Renaissance and the principles of modern thought. Historical context and main characteristics. The learned ignorance in N. de Cusa. Renaissance and Reformation. Humanism and skepticism in M. de Montaigne. J. Bodino: the foundation of the concept of sovereignty of the modern state. Machiavelli: the autonomy of the political. F. Bacon: the method of science. The Renaissance utopias.

2. European rationalism

R. Descartes: The "universal science" and the principles of the method. The operations of the mind: intuition and deduction. Cartesian innateness. The methodical doubt. The code and the metaphysical justification of knowledge. B. Pascal: The thoughts. B. Spinoza: Doctrine of the substance. The attributes and the ways. God and man. Ethics. N. Malebranche: the investigation of the truth. The Cartesian vicious circle. Metaphysics and religion. G.W. Leibniz: Logic and Metaphysics. The distinction between truths of reason and truths of fact. Doctrine of the substance: monadology. The preset harmony. The practical philosophy.

3. British empiricism

The materialistic mechanism. The foundation of modern political science. J. Locke: Between rationalism and empiricism. Criticism of the doctrine of innate ideas. The materials of knowledge: doctrine of ideas. Ideas and qualities. Doctrine of the substance. The critique of absolutism and the foundation of liberal political theory. G. Berkeley: between empiricism and idealism. The foundation of modern phenomenalism: the doctrine of "esse este percipi". D. Hume: The Science of Human Nature. Theory of knowledge. The distinction between impressions and ideas and the empiricist criterion of meaning. Relations of ideas and questions of fact. Proof and causal inference. The substance. Causality. Ethical and political thinking.

Important: The items collected and the bibliography proposed in each section have a general orientation for the teaching of the different groups of the subject, without preventing teachers from introducing their own orientation in the development of the program and in the specific choice of material textual.

**WORKLOAD**

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Seminars	15,00	100
Tutorials	5,00	100
Development of individual work	15,00	0
Readings supplementary material	15,00	0
Preparation of evaluation activities	30,00	0
Preparing lectures	30,00	0
Preparation of practical classes and problem	10,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

1. Theoretical classes: There will be two hours of theoretical classes, taught by the teacher and in which the students can actively participate.
2. Preparation of theoretical classes. The students will have to attend the theoretical classes having read the material that the teacher has recommended for each session, both in terms of the classic texts and the basic secondary bibliography. This previous work is essential for the good follow-up of the classes and for the desirable active participation of the student in their development.
3. Practical classes. The class group will eventually be divided, depending on the number of students enrolled, into two groups of practices, and each one will attend scheduled face-to-face classes, which are one hour per week. Occasionally these hours can be grouped together and done two hours in a row every two weeks. These classes, conceived as a complement to the theoretical explanation of the contents of the subject, will follow the model of analysis and comment of texts directly related to the theme developed by the teacher in the theoretical classes.
4. Voluntary work: Students will be able to carry out, individually or in groups, a written work on authors or problems related to the general syllabus for the realization of which they will have the direction of the teacher. The subject of the work will have to be communicated to the professor prior to its completion and an outline and / or scheme will have to be submitted for prior approval. The deadline for submitting proposals would end on the last day of the semester that there are hours of attention to the student. The writing will have to include critical reflections, having to indicate with precision the bibliography used and the passages that have been cited from it in the work. Failure to comply with any of these conditions will lead to disqualification from the job. The qualification of the work will be part of the final grade up to a maximum of two points.
5. Tutorials. At the time that will be made public in due course, the queries that the student may make regarding the issues dealt with in the theoretical classes, their readings of the basic or complementary bibliography, or any other queries related to the contents or development of the course.

EVALUATION

The acquisition of knowledge will be evaluated by means of a written exam consisting of wide-ranging questions referring to different parts of the syllabus. The exam will be scored numerically with up to a maximum of 10 points. In case of considering the obligation to carry out a work related to the activities carried out in the practical classes, said work would have a maximum value of 3 points, so the written exam would have a maximum value of 7 points.

The completion of the voluntary work (which will have to be sent, preferably by email, at the latest on the date set for the official exam of the theoretical part) will have a grade of up to 2 points. This qualification will be added to the one obtained in the written exam (provided that this has been of 5 or more points, or of 3.5 or more if the evaluation is carried out on 7) to determine the final qualification in the subject.

The score of the practical and / or voluntary work in the case of students who do not pass the examination of the subject in the first call, will be valid for the second call. Those who have not submitted volunteer work in the first call, will not be able to do it for the second.

Fraudulent performance in the of evaluation tests and plagiarism in any evaluation work will be considered in accordance with the ACGUV 108/2017 and ACGUV 123/2020 regulation. The use of technologies (including AI), which is not previously authorised by the teaching staff, to create assessment materials will mean that these will not be considered as self-authored and will be treated according to current regulations.
