## OUTCOMES

### 1301 - Degree in Audiovisual Communication

- Knowledge of communication as a process and the different elements that comprise it. The ability to assimilate knowledge of the specificity of discourse, as well as the representation methods proper to the different technological and audiovisual media. Familiarity with the different theories, methods and problems involved in audiovisual communication and its different languages.
- The ability to apply this knowledge (See Competence 2314) to transmit it in an ethical and professional way and in a manner that is comprehensible for people.
- The ability to transmit ideas, problems and solutions within the field of audiovisual communication.
- Knowledge of the different languages, codes and representation methods of the different technological and audiovisual media: photography, cinema, radio, television, video and electronic image, the Internet, etc. through their aesthetic and industrial proposals and their evolution over the years, which should generate a capacity to analyse audiovisual narratives and works, taking into account iconic messages such as the texts and products of the socio-political and cultural conditions of a given historic era.
- Students must be able to deepen their acquired knowledge and to develop and apply these skills in the various fields of audiovisual communication.
