Data Subject	
<b>Code</b>	33454
<b>Name</b>	Education theory
<b>Cycle</b>	Grade
<b>ECTS Credits</b>	6.0
<b>Academic year</b>	2023 - 2024

### Study (s)

Degree	Center	Acad. Period year
1306 - Degree in Social Education	Faculty of Philosophy and Educational Sciences	1 First term

### Subject-matter

Degree	Subject-matter	Character
1306 - Degree in Social Education	16 - Education	Basic Training

### Coordination

Name	Department
GARCIA GARCIA, FRANCISCO JAVIER	335 - Education Theory
GARGALLO LOPEZ, BERNARDO	335 - Education Theory
VERDE PELEATO, IRENE	335 - Education Theory

## SUMMARY

As an academic discipline, the theory of education under a basic training curriculum of Pedagogy and Social Education and training a focus of particular relevance to the professional profile. Its location in the first grade curriculum is a variable that influences decisions about the choice and treatment of content teachers disciplining effects.

It is a theory of scientific and technological education as well as humanist, which aims to provide students with the knowledge, skills and attitudes / values necessary for their training as social educators / teachers. The Theory of Education aims to study the educational process in general terms, with the aim to provide students an overview, understanding and integrity. This will enable title in other disciplines can focus attention on both elements of that process as well as specific objects of the same, without losing the overview.

As a discipline of initial training of graduate studies, the Theory of Education provides a body of knowledge about the subject matter of pedagogy. So it faces the same analysis of what is education, its dimensions and typologies

It addresses also the Theory of Education to clarify the conditions of scientific knowledge of education, its epistemological status and location in the field of Educational Sciences of the various disciplines concerned with the study of educational phenomenon.

Study also this discipline the subject of education and the elements and actors in the educational process. It deals also, the theory Education general educational process, as has been said before, and to analyze the threads that make up that vision to acquire comprehensive and inclusive social needs and teacher educator for training and performance professional.

## PREVIOUS KNOWLEDGE

## **Relationship to other subjects of the same degree**

There are no specified enrollment restrictions with other subjects of the curriculum.

### **Other requirements**

N O P E

## OUTCOMES

**1306 - Degree in Social Education**

- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.
  - Students must be able to communicate information, ideas, problems and solutions to both expert and lay audiences.
  - Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.
  - Have capacity for analysis and synthesis.
  - Demonstrate organisational and planning skills.
  - Be able to communicate professionally, both orally and in writing, in the Universitat de València's native languages.
  - Be able to use ICT in the field of study and in the professional context.
  - Have skills for information management.
  - Have problem-solving skills and decision-making capacity.
  - Have critical and self-critical capacity.
  - Acknowledge and respect diversity and promote interculturality.

- Be able to develop, promote and revitalise interpersonal communication skills.
- Show active ethical commitment to human rights, gender equality and sustainability.
- Be prepared for independent lifelong learning.
- Demonstrate initiative and entrepreneurship.
- Show commitment to professional identity, development and ethics.
- Be able to conduct educational research in different contexts.
- Be able to recognise and value affective processes.
- Understand the theoretical references that constitute the human being as an active player in education.

## LEARNING OUTCOMES

- 1) From various sources of information, the student understands, explains and accurately describes the educational phenomenon and its conceptual network, and also the different issues related to the subject of education, educational agents and agencies as well as the dimensions of education, being able to establish relevant relationships between concepts.
- 2) He/she internalizes a comprehensive and integrating vision of the educational process and its various components and he is able to describe and relate them appropriately.
- 3) The student justifies the scientific nature of Pedagogy and properly places the Theory of Education in the context of Pedagogy and Educational Sciences.
- 4) From the assimilated conceptual basis, he/she effectively develops an introductory research work that includes information gathering, analysis and synthesis skills, and critical reflection. For this, it uses cooperative work, whose quality keys are integrated in its elaboration. Each group prepares a report on the research carried out, which they present orally to the class, being able to argue and respond to questions and objections raised.
- 5) He/she improves one's own learning strategies, placing special emphasis on autonomous, significant and self-regulated learning.
- 6) The student shows an ethical commitment to the own learning process and also to improve their social environment.

## DESCRIPTION OF CONTENTS

### 1. Foundations of education

Conceptualization of education: concept, scope, dimensions.

Education and learning throughout life

Education for sustainable human development

Subject, educational agents and agencies

## 2. Knowledge of education

Science Education

Epistemological approaches

## 3. Education as a process: theoretical and methodological approaches

The educational process. A theoretical model

The focus of critical pedagogy

The technological approach

## 4. The educational and learning

Learning Theories

Content and facilitators of the educational

Strategic and metacognitive processes

## WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	45,00	100
Classroom practices	15,00	100
Attendance at events and external activities	5,00	0
Development of group work	20,00	0
Development of individual work	10,00	0
Study and independent work	18,00	0
Readings supplementary material	10,00	0
Preparation of evaluation activities	8,00	0
Preparing lectures	15,00	0
Preparation of practical classes and problem	4,00	0
<b>TOTAL</b>	<b>150,00</b>	

## TEACHING METHODOLOGY

Depending on the learning objectives are different methods used will be specified in the various activities (lectures, practicals, tutorials, seminars): expository methodology, cooperative work, group discussion, text commentary, practical activities and individual application and group.

In the theoretical classes will use a participatory approach with the exposition and application of techniques of group dynamics.

The development of practical classes will be scheduled in a guide that is available to students. To be announced completion deadlines and reporting practices.

Throughout the course, students will be compiling a series of documents and conducting a series of

readings and activities for the preparation and study of the subject, these documents, readings and activities should be specified and relate in a "teaching kit or portfolio "give every student the teacher, following the scheme of work specified in this Guide, the dates are notified promptly Workgroups. Students will complete the course work in teams on topics proposed by the teacher / a, under his tutoring and guidance. The work will be discussed in class with a PowerPoint presentation, and will provide a written copy to the professor / a.

## EVALUATION

The evaluation was performed with the following:

1) oral or written test. There will be oral or written examination at the end of the course. This exam will consist of issues relating to the subject program (theoretical and practical content presented by the teacher) and readings by students / a in relation to the issues. The value of the test is 40% of the final grade.

2) 2.1.) Alternative 1 <sup>a</sup>: time and form determined by / the teacher / students to submit the following documents whose value accounts for 60% of the final grade:

2.1.1.) Portfolio: whose value is 20% of the final grade.

2.1.2.) Reports of the practice: whose value is 20%.

2.1.3.) Group work: the value is 20%

2.2.) Alternative 2 <sup>a</sup>: Portfolio. Students will deliver on the dates specified a portfolio whose value will be 60% of the final, which will include the following:

2.2.1.) Activities developed in relation to the theory (20% of score)

2.2.2.) Reports of the practices (20% of score)

2.2.3.) Teamwork (20% of score)

To pass the course the student / a will have to approve each of the four sections (1, 2.1.1., 2.1.2 and 2.1.3 or 1, 2.2.1., 2.2.2. And 2.2.3. )
