SUMMARY

The aim of this subject is to give a basic knowledge about the main questions in History of Social Education. Among these aspects, we can mention the historical and educational basis and the most important ideas, in the case of Spain, about assistance, poverty and education of several social groups located in the edge of the society. The objective is to make students to internalize concepts and processes thanks to which they could think critically about and identify historical antecedents of the ways of work in Social Education nowadays.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

OUTCOMES

1306 - Degree in Social Education

- Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.
- Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.
- Have capacity for analysis and synthesis.
- Have critical and self-critical capacity.
- Show commitment to professional identity, development and ethics.
- Understand the theoretical references that constitute the human being as an active player in education.
- Know and understand the current educational and training systems in the international context.
- Know and interpret the historical processes of education and training systems, institutions and organisations.
- Know and analyse educational policies, their legislative development and their impact on socio-educational reforms.

LEARNING OUTCOMES

The students will be able to understand the History of Social Education, know the three plots that define the identity space of Social Education (adult education, non-formal education and specialized education), work the academization or disembarkation in the universities of Social Education and its configuration as an academic discipline. Collegiation and the history of deontologization. Know and address social assistance and proposals for education and re-education in the Late Middle Ages and in the first centuries of modernity (16th and 17th centuries). Reflect on care and re-education in the 18th and 19th centuries and delve into Education and care in the 20th century.

Classroom practices	15,00	100
Attendance at events and external activities	2,00	0
Development of group work	25,00	0
Development of individual work	10,00	0
Study and independent work	25,00	0
Readings supplementary material	8,00	0
Preparing lectures	10,00	0
Preparation of practical classes and problem	10,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

The didactic methodology is based on the development of the contents through a close link between theory and practice, combining both group and collaborative work and individual work. In addition to seminars, tutorials and complementary activities.

In the practical part, for those enrolled in three subjects or more from the 1st semester of 3rd, the development of an integrating project will be considered. From this subject the historical section will be studied and evaluated.

For people who have not enrolled the other subjects of 1st semester, a specific work plan will be designed.

EVALUATION

The evaluation will include:

Practical activities. Participation will be especially valued and will represent 60% of the grade. These activities may be: written, oral, individual and collective.

The contents worked will be evaluated by means of an **exam** that will suppose 60% of the final grade.

It will be necessary to obtain a minimum grade of 5 to add the grade obtained to the practical activities
