Coordination

Name	Department
CANET GINER, MARIA TERESA	105 - Business Administration 'Juan José Renau Piqueras'

SUMMARY

Policies, strategy and Human Resources Management is an optional subject of 6 credits and is taught to the fourth year of the Degree in Labor Relations and Human Resources, forming part of the specialty itinerary in Human Resources (itinerary B).

This subject aims to deepen the content of the **Human Resources function** that has greater interdependencies with organizational design decisions, taking a step further on the contents presented to the subjects **Structure of the organization and jobs design** and **function From Human Resources**. Everything from the strategic perspective, already initiated to the subject **Strategic management of the company**.

It is about deepening the strategic process applied to the Human Resources function from a vision of Business Management, seeking to achieve the following general objectives:

Present, from the perspective of the Strategic Management, the general theoretical framework of the Human Resources function in a complete and integrated manner.

- Study the function as an integral part of the strategic process, placing it within the general process and at the same level as the other key functions of the organization, with which it must be coordinated.
- Understand the need to have formulated a specific strategy of the function, which must be specified in order to be effectively implemented and be able to evaluate it in order to improve and / or change the process.

We must highlight the relationship with issues such as Quality Management and Corporate Social Responsibility that are studied in other subjects of the specialty and, above all, with the **Audit of the Human Resources function**.

Likewise, an attempt will be made to analyze critically how the current situation of the environment influences the Human Resources strategies of the organizations and people motivation.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Although no enrollment restrictions have been specified with other subjects of the curriculum, the appropriate use of this subject requires assimilating the contents of the subjects of management and organization of companies, especially those related to the subjects:

- Introduction to the operation of the company
- The management in the company
- Structure of the organization and jobs design
- The function of Human Resources
- Strategic management of the company

OUTCOMES

1309 - Degree in Labour Relations and Human Resources

- Students must have acquired knowledge and understanding in a specific field of study, on the basis of general secondary education and at a level that includes mainly knowledge drawn from advanced textbooks, but also some cutting-edge knowledge in their field of study.

- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.
- Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.
- Students must be able to communicate information, ideas, problems and solutions to both expert and lay audiences.
- Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.
- Be able to learn independently and develop initiative and entrepreneurship.
- Be able to organise and plan.
- Be able to manage information and to write and formalise reports and documents.
- Be able to analyse, synthesise and reason critically.
- Be able to solve problems, apply knowledge to practice and develop motivation for quality.
- Be able to communicate orally and in writing.
- Be able to use new information and communication technologies.
- Be able to work in a team.
- Respect and promote the principles of fundamental rights, gender equality, equal opportunities and non-discrimination, democratic values and sustainability.
- Know and apply the principles of the professional code of ethics.

LEARNING OUTCOMES

- Students must have acquired knowledge and understanding in a specific field of study, on the basis of general secondary education and at a level that includes mainly knowledge drawn from advanced textbooks, but also some cutting-edge knowledge in their field of study.
- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.
- Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.
- Students must be able to communicate information, ideas, problems and solutions to both expert and lay audiences.
- Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.

- Ability to learn autonomously and develop initiative and entrepreneurial spirit.
- Ability to organize and plan.
- Ability to manage information, write and formalize reports and writings.
