SUMMARY

English version is not available

La estructura social es la parte de la sociología que estudia los elementos básicos y estables que definen la sociedad y orientan el comportamiento humano. En el ámbito educativo esta perspectiva pretende esbozar el campo de relaciones sociales del que surgen los procesos de formación y adquisición de conocimientos.

De este modo, la asignatura de Estructura Social y Educación pretende aclarar las relaciones establecidas entre: a) los comportamientos individuales, b) las principales instituciones sociales (económicas, políticas, culturales), y c) los diversos procesos educativos. El objetivo es presentar las principales corrientes teóricas y metodológicas que se enfrentan a la dificultad de captar e interpretar dichas relaciones, y reflexionar críticamente en torno a ellas.

El curso se considera, por tanto, una introducción a la mirada sociológica de la realidad educativa. Su finalidad consiste en proporcionar los instrumentos y las competencias básicas para desarrollar dicha perspectiva. En el curso del segundo año Sociología de la Educación se profundizará en algunas de las áreas estudiadas.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Los requeridos formalmente para acceder a la Titulación.

COMPETENCES (RD 1393/2007) // LEARNING OUTCOMES (RD 822/2021)

1305 - Degree in Primary School Education

- Express oneself orally and in writing correctly and appropriately in the official languages of the autonomous region.
- Use information and communication technologies effectively as usual working tools.
- Analyse critically the most relevant issues in today's society that affect family and school education: social and educational impact of audiovisual languages and of screens; changes in gender and inter-gender relations; multicultural and intercultural issues; discrimination and social inclusion, and sustainable development; Also, carry out educational actions aimed at preparing active and democratic citizens, committed to equality, especially between men and women.
- Promote cooperative work and individual work and effort.
- Assume that teaching must be perfected and adapted to scientific, pedagogical and social changes throughout life.
- Know the processes of interaction and communication in the classroom.
- Recognise the identity of each educational stage and their cognitive, psychomotor, communicative, social and affective characteristics.

- Design, plan and evaluate teaching and learning classroom activities in multicultural and co-educational contexts.
- Know how to work as a team with other professionals within and outside the school to attend to each student, to plan the learning sequences and to organise work in the classroom and in the play space.
- Know and apply basic educational research methodologies and techniques and be able to design innovation projects identifying evaluation indicators.
- Understand that systematic observation is a basic tool that can be used to reflect on practice and reality, and to contribute to innovation and improvement in education.
- Identify and plan the resolution of educational situations that affect students with different abilities and different learning rates, and acquire resources to favour their integration.
- Show social skills to understand families and to make oneself understood by them.
- Create and maintain communication links with families to effectively influence the educational process.
- Know and be able to exercise the functions of tutor and adviser in relation to family education.
- Relate education to the environment and cooperate with families and the community.
- Promote and collaborate in actions inside and outside the school, organised by families, town halls and other institutions, with an impact on citizen education.
- Collaborate with the different sectors of the educational community and of the social environment.
- Know the historical evolution of the family and the different types of families, lifestyles and educational styles in the family context.
- Observe and explore the family, natural and social environment.
- Acquire skills for the prevention and peaceful resolution of conflicts which allow students to cope autonomously in the family and domestic environment, as well as in the social groups with which they relate.
- Promote coexistence in and outside the classroom, solve discipline problems, address conflicts and contribute to their peaceful resolution.
- Know, understand and respect the different cultures and the differences between people, the equality of rights and opportunities for men and women and the non-discrimination of people with disabilities.
- Learn how to act as a counsellor for parents or tutors in relation to family education in each educational period and master social skills for dealing with and relating to each student's family and to families as a whole.
- Understand the role, possibilities and limits of education in today's society and the fundamental competences that affect pre-primary and primary schools and their professionals. Be aware of quality improvement models that can be applied to schools.
- Reflect as a group on the acceptance of rules and respect for others. Promote the autonomy and uniqueness of each student as factors in the education of emotions, feelings and values in early childhood.

- Carry out the functions of tutoring and guidance with students and their families, attending to the unique educational needs of the students.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

English version is not available

1. Reducción del peso de unas actividades y sustitución por otros manteniendo el volumen de trabajo que marca la guía docente original

En la guía docente original el volumen de trabajo se planifica en dos grandes bloques.

- Un primer bloque basado en las exposiciones del profesorado junto con la participación activa del estudiantado en torno a los contenidos expuestos a través de las preguntas y debates propuestos.
- En un segundo bloque, donde el trabajo es de tipo autónomo por parte del estudiante a través de diferentes actividades como lectura de libros y / o textos, visionado de vídeos, entrevistas a profesionales ... Estas actividades siempre cuentan con la guía y acompañamiento del profesorado. Este segundo bloque contempla la realización de proyectos, tertulias y aprendizaje cooperativo con la organización de grupos de trabajo. El seguimiento de este trabajo autónomo y cooperativo será realizado por el profesorado de manera on line para adaptarse al modelo híbrido propuesto por las circunstancias sobrevenidas.

En el planteamiento hecho por la Facultad de Magisterio se prevé que esta asignatura reduzca la presencialidad en el aula pero que esto se supla con trabajo autónomo que tendrá la correspondiente atención del profesorado a través de las plataformas online disponibles (desdoblamiento de grupos y presencialidad del 50%). Pero el volumen de trabajo y el grado de seguimiento del profesorado al trabajo autónomo los estudiantes será el mismo.

2. Metodología docente

La metodología docente se modificará parcialmente con el fin de adaptarla a la nueva situación del modelo híbrido y semi-presencial. La parte telemática y no presencial se podrá llevar a cabo mediante los siguientes recursos disponibles:

1. Subida de materiales al Aula virtual
2. Propuesta de actividades por aula virtual
3. Videoconferencia síncrona BBC
4. Videoconferencia asíncrona BBC
5. Transparencias locutadas
6. Debates en el fórum
10. Desarrollo de proyectos
11. Tutorías mediante videoconferencia

Cada profesora o profesor empleará los recursos idóneos según la parte del contenido que esté impartiendo. Se realizará un seguimiento híbrido al estudiantado

3. Evaluación

La evaluación los siguientes recursos para mantener la distribución decidida y contemplada en la guía docente original:

- 3 Pruebas de evaluación mediante trabajos académicos (el 50% de la nota total) y
- 7 Prueba escrita abierta (examen tradicional) pero distribuido en aula virtual
(el otro 50%).
