- Recognise the need to maintain and update professional competence, with particular emphasis on independent and lifelong learning of new facts, products and techniques in the field of nutrition and food, and on motivation for quality.
- Know, judge and know how to use and apply the sources of information related to nutrition, food, lifestyles and health.
- Adquirir la terminología propia de la materia de Nutrición en situaciones de emergencia.
- Know the double burden of malnutrition and its distribution around the world, as well as the political impact of undernutrition.
- Study the different emergency situations and their evolution in the context of war, population displacement, discrimination and natural disasters.
- Evaluate undernutrition from all perspectives.
- Know the different treatments used in undernutrition in emergency situations.
- Study the different modes of rehabilitation and monitoring of undernourished patients.
- Know the operation and organisation of nutritional rehabilitation centres and mobile nutrition centres.
- Design projects that can help in situations of undernutrition in emergencies.

- Conocer las organizaciones de salud, nacionales e internacionales, así como los diferentes sistemas de salud, reconociendo el papel del dietista-nutricionista.

LEARNING OUTCOMES (RD 1393/2007) // NO CONTENT (RD 822/2021)

The development of the subject is divided into: Class theory: 4 weekly sessions of one hour. The teacher will available early enough in the platform of support for teaching "Virtual Classroom", the material necessary for the proper monitoring of the lectures. The lectures provide notably the acquisition of knowledge, and contribute less to the acquisition of procedures and attitudes. Hands-on labs: These are compulsory attendance and are held in the computer room. Are conducted in two sessions of 4 hours. During the sessions there will be a script for the sessions "lab notebook" that will allow students to develop them. The practical sessions contribute mainly to the acquisition of skills, and to a lesser extent that of attitudes and knowledge. Seminar: It's compulsory attendance and completion for students who are enrolled. Should be conducted in groups of 4 or 5 students, according to the general rules laid down for this title. Tutorials: Students will come to them in organized groups will be two in total. The duration of such tutoring will be one hour. In them, the teacher will evaluate the learning process of students in a globalized world. Also, the tutorials will be used to resolve all the doubts that have arisen over the classes and guide students about the working methods more useful for solving the problems they may have.

DESCRIPTION OF CONTENTS

1. TO DEFINE

- Emergency and malnutrition in the world
 - o Definition
 - o Classification
 - o History
 - o Current situation.
- Humanitarian systems
 - o Rules
 - o Responsibilities
 - o Coordination.
 - o The Sphere Project

2. TO KNOW

- Malnutrition in emergencies
 - o Pathophysiology
 - o Clinic.
- Nutritional recovery centers.
 - o Classification
 - o History
 - o Structure

**3. TO ACT**

- Assessment of nutritional status
 - o Individual viewpoint
 - o Nutrition community viewpoint.
 - o Relation to food security.
- Dietetic treatment:
 - o Moderate acute malnutrition.
 - o Severe acute malnutrition.
 - o Micronutrient malnutrition.
- Assessment of a nutritional program in emergency and surveillance systems.
- Food distribution.

4. TO REPORT

- Search for employment / training / volunteering in emergency nutrition.
- Project cooperation-nutrition in emergency situations: calls, processing, monitoring and final report.
- Research and publication in emergency situations.

WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Computer classroom practice	8,00	100
Seminars	2,00	100
Tutorials	2,00	100
Attendance at events and external activities	2,00	0
Development of group work	5,00	0
Development of individual work	5,00	0
Study and independent work	30,00	0
Readings supplementary material	4,50	0
Preparation of evaluation activities	3,00	0
Preparing lectures	2,00	0
Preparation of practical classes and problem	8,00	0
Resolution of case studies	8,00	0
TOTAL	109,50	

TEACHING METHODOLOGY

The course is structured as follows: Lectures. Include 4 hours each week in which the teacher provides the overview of the topic and a addition to the information necessary to understand the contents of the subject. The classes will encourage students to seek information and additional accessory, guiding the use of bibliographic sources necessary. To monitor the class the student should review the material before the teacher leave the tutorial aula virtual. Sesiones Specialized group: will be organized in small groups of students with la finalidad to guide students and determine how the progress. It will be the ideal means for students to raise questions or issues that arise throughout the agenda. Practical sessions in computer lab: There will be in small groups and attendance is mandatory. In these sessions goes step by step the student's work to achieve queadquiera skill in finding employment and volunteering information on nutrition in emergencies, and the pages of calls for research projects and / or related cooperation theme of the course. Students present the results and discusses their interpretation. Seminars / work: There will be group work on an issue raised by the teacher to expose the rest of the class and generate further discussion. Be given in writing in advance of a screenplay exposure to peers. The group is personally supervised by the teacher on a regular basis that guide the search for literature sources and critical analysis of the data found these sources. The teacher will advise on the overall approach of the work, so that building work capacity, synthesis and investigation of student

During the activities, both theoretical and practical, examples of the applications of the contents of the subject in relation to the Sustainable Development Goals (SDG) will be indicated, as well as in the proposals of topics for the coordinated seminars. This is intended to provide students with knowledge, skills and motivation to understand and address these SDGs, while promoting reflection and criticism.

EVALUATION

For the evaluation of the theoretical, with an examination, corresponding to the contents of the agenda. The note will achieved 70% of the overall grade of the course.

Computer practical classes will be evaluated through attendance and completion of a written examination to be held at the same sitting the examination of theoretical. The mark obtained will be 20% of the final grade.

The preparation and presentation of seminars represent 10% of the final grade.

Besides the teacher directly assess the student's attitude and participation in both the theoretical and in practice.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

3. Teaching methodology

All the contents initially programmed in the teaching guide for the theoretical sessions are maintained. The theory, tutorials, seminars and practices will be developed with the BBC platform.

4. Evaluation

Maintenance of the proportion of the practices of 20%.

Maintenance of the notes resulting from the continuous evaluation obtained before the entry into force of the alarm state to which the different proposed activities will be added. Increase in the weight of continuous assessment, which is from 10% in the teaching guide to 15%.

Final exam reduced from 70% to 65%. The final evaluation test will be based on an exam with multiple-choice questions and short questions in the virtual classroom.

If a person does not have the means to establish this connection and access the virtual classroom, they should contact the teaching staff by email at the time of publication of this annex to the teaching guide.
