SUMMARY

This subject, in compliance with European Directives 85/432, 85/433 and 2013/55 and Royal Decrees 1567/1989 and 1460/1990, is a six-month internship to be carried out at community pharmacies or hospital pharmacy services under the supervision of a pharmacist. As the modalities differ, the contents vary slightly. However, there is a common point, gaining skills related to the different modalities of professional activities of pharmacists concerning pharmaceutical care, teamwork, collaboration with other health professionals and ethical aspects of pharmacy practice. The timetable of internship management is published in the faculty website

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

The student must have passed 220 credits corresponding to obligatori and basic matter

OUTCOMES

1201 - Degree in Pharmacy

- To possess and to understand the knowledge in the different areas of study included in the formation of the pharmacist.
- To apply this knowledge to the professional world, contributing to the development of Human Rights, democratic principles, principles of equality between women and men, solidarity, protection of the environment and promotion of a culture of peace with Gender perspective.
- To know how interpret, value and communicate relevant data in the different aspects of pharmaceutical activity, making use of information and communication technologies.
- Skill to communicate ideas, analyze problems and solve them with a critical mind, achieving team-working abilities and assuming leadership whenever required.
- Development of skills to update their knowledge and undertake further studies, including pharmaceutical specialization, scientific research and technological development, and teaching.
- Develop know-hows for their professional career.
- Organize and manage the processes of a pharmacy office.
- To know the procedures and management of a hospital pharmacy or primary care service, including the personnel attached to them
- Manage medications
- Preservation, safekeeping, dispensing and rational distribution of medicines and other pharmaceuticals
- Prepare compound formulas and individual prescriptions.
- Provide pharmaceutical care to patients
- Perform pharmacovigilance
- Learn to communicate with patients and other health care professionals

- Know and specialize in health education.

LEARNING OUTCOMES

Once the period of the supervised internship has been concluded the student will know:

- how to organise and manage a community pharmacy, a hospital pharmacy service or a primary health centre,
- drug management: conservation issues, safe keeping, dispensation and rational use of drugs and other pharmaceutical products;
- compounding of formulations and officinal preparations;
- being able to provide pharmaceutical attention to patients;
- how to perform pharmacovigilance;
- invoice management, in the case of community pharmacies

DESCRIPTION OF CONTENTS

1. Hospital training

1. Structure, organization and procedures in a Pharmacy Service
2. Medication management: acquisition, storage and conservation.
3. Dispensing medications.
4. Formulations: pharmacotechnia and intravenous mixtures.
5. Drug Information and selection
6. Pharmacokinetics.
7. Clinical trials.
8. Pharmaceutical care to hospitalized patients.
9. Pharmaceutical care to outpatients.
10. Nutritional support
11. Oncology pharmacy.
12. Risk management and pharmacovigilance.

2. Practice in pharmacy

1. Estructura sanitaria nacional y comunitaria. La oficina de farmacia.
2. Adquisición, almacenamiento y conservación de productos farmacéuticos.
3. Dispensación e información al paciente.
4. Formulación magistral y preparados oficinales.
5. Facturación y libros recetarios.
6. Legislación y fuentes bibliográficas.
7. Farmacovigilancia y Atención Farmacéutica.
8. Otras actividades propias y complementarias de la Oficina de Farmacia.

WORKLOAD

ACTIVITY	Hours	% To be attended
Clinical practice	630,00	100
Seminars	18,00	100
Tutorials	12,00	100
Readings supplementary material	15,00	0
Preparation of evaluation activities	30,00	0
Resolution of case studies	15,00	0
TOTAL	720,00	

TEACHING METHODOLOGY

Practical classes: attending daily activities of the pharmacy or hospital together with the teaching staff.

Clinical sessions: discussing common problems in pharmacy service

Internship at the hospital pharmacy service: detailed literatura available at the virtual classroom.

Internship at dispensing chemists: websites

EVALUATION

The evaluation of the student's final mark will be made considering teachers' and managers' assessment do the following:

- Organised activities (student congress, workshops and tutorial) : 5%.
- "Report" submitted by students at the end of their internship: 25%.
- "Tutors Report" about the student's attitude, academic progress and learning process: 10%.
- "Written Test" on the contents of the programme, including test questions and solving practical problems.

- Participation in seminars, group work or activities on-line.

The "Written Test" will represent 60% of the final mark, while other activities make up 40%.

The evaluation system applies to two ways the subject can be taken, either at dispensing chemist's or at hospital pharmacy.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

The sections are modified:

Workload and temporal planning of teaching

The workload for the student is maintained, derived from the number of credits, but the methodology of the activities that are carried out during their stay in the pharmaceutical service of a hospital or in a community pharmacy may be temporarily modified for sanitary or unforeseen reasons. In this situation, a hybrid modality is programmed for teaching (a combination of part of the face-to-face hours and others by telematic means) or, in the event of a suspension of the supervised Practices by the health authorities, a program of training activities in telematic mode.

Teaching methodology

In the event that there are changes in the presence, the development of the training project will be maintained and some activities will be replaced by the completion of courses, tasks or complementary on-line sessions.

Evaluation

The evaluation and assessment system that is applied to the two modalities in which this Module can be taken is maintained, passing, if necessary, the "Written Test" on the contents of the program (60%), to the online questionnaire modality from Virtual Classroom.
