**SUMMARY**

This course aims to incorporate the students to the university in general studies and sociology in particular. This is why it is in the 1st quarter of 1st year of undergraduate studies in Sociology.

This subject tries to provide the most basic competence elements of university life, as well as the profession of sociologists, and social research. It is located in the module of *Incorporation and practices*, in which there is also the subject of «External Practices», the final year of Degree. It is, therefore, a module that aims to facilitate the transitions that have to live the students: at the start, easing the transition to university life and study of the Degree in Sociology; at the end, it facilitates the transition to professional life. Along with the subject Introduction to Sociology, its purpose is to provide students with the conceptual and analytical tools that be able to go about building and organizing knowledge throughout their studies.

With 6 ECTS planned, will discuss issues related to the structure of the University of Valencia and, within it, the Faculty of Social Sciences, student participation in academic and political life of our university, resources and services available, and the office of the sociologist, the employability and social research. Also, students will work instrumental and informational skills related to the teaching-learning methodologies and access to materials and information resources

It is, therefore, a subject of great practical utility and applicability to other subjects and in the process of student learning, because by working on it, you can gain knowledge, skills and attitudes that are useful both during the study period and in the transition to work.

## PREVIOUS KNOWLEDGE

### Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

### Other requirements

## OUTCOMES

### 1310 - Degree in Sociology

- Students must have acquired knowledge and understanding in a specific field of study, on the basis of general secondary education and at a level that includes mainly knowledge drawn from advanced textbooks, but also some cutting-edge knowledge in their field of study.
- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.
- Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.
- Students must be able to communicate information, ideas, problems and solutions to both expert and lay audiences.
- Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.
- Work in a team with a multidisciplinary perspective.
- Clearly communicate theories, problems and proposals of a sociological nature, both orally and in writing, using new information and communication technologies.
- Apply the principles of the professional code of ethics of sociology and develop a commitment to social problems.

- Respect and promote the principles of fundamental rights, gender equality, equal opportunities and non-discrimination, democratic values and sustainability.
- Learn independently and develop initiative in the field of sociology.
- Develop gender perspective and integrate it into the study of social reality.
- Analyse social phenomena adopting a multidisciplinary perspective (sociological, psychosocial, economic, political, historical and anthropological).

ACTIVITY	Hours	% To be attended
Theoretical and practical classes	60,00	100
Attendance at events and external activities	24,00	0
Development of group work	18,00	0
Development of individual work	22,00	0
Readings supplementary material	12,00	0
Preparation of evaluation activities	14,00	0
<b>TOTAL</b>	<b>150,00</b>	

**TEACHING METHODOLOGY**

The learning activities provided in this course consist of the following:

- Expositive activities of teachers: classroom sessions devoted to expositions of teachers, with student participation, referring to the conceptual and relational content of each unit.
- Practical activities in the classroom: classroom sessions devoted to the exercises, commentary, analysis, and various activities related to the contents previously worked for the expositive activities. Throughout the course work texts, there will be problem-solving activities, are viewed audiovisual documentaries or movies, etc.
- Activities outside the classroom: work and study time spent by students on the course and consists of both individual work and team work, to prepare study materials for the classroom, but also attendance at seminars or complementary activities.
- Activities on information competencies and documentaries, introductory level, in collaboration with the technical services of the Library of Ciències Socials – Gregori Maians.

**EVALUATION**

The evaluation of the course will be held from practical activities presented by the students and from the results obtained with an exam at the end of the course.

a) Continuous evaluation will account for 30% of the final grade. It will consist of individual or group practical activities, the assessment of Informational and Digital Competences, attendance and participation in the complementary training activities that will be developed during the course, as well as regular attendance and active participation of the students in the sessions in the classroom. Some of these activities may not be recoverable outside of the continuous evaluation, that is, in the examinations of the official calls, due to the own nature of the activities. The activities which are not recoverable will be specified.

b) Designing a research. This is a groupal activity and it will account 30% of the final grade.

c) The final exam will account for 40% of the final grade. This test will be referred to the contents of the program worked during the course.

To pass the subject, it will be necessary to pass the last two parts, the one of designing a research and the examn, with a value of 10 each one.
