EVALUATION

The composite grade is based in 2 elements, both in the first and in the second exam periods:

a) A final exam: at the end of the course a final test will be carried out on all the contents of the course, whether they have been taught in the classroom or not. The exam will also include the materials that are included in the different sessions. This test will have a value of 60 percent of the overall score. The student must have achieved at least a 4 (out of 10) to add the score of the assignments made in the class along the course.

b) Assignments in the class: Throughout the semester will be made different exercises and complementary activities of various kinds to be delivered in presence the day of the course (some of them require that the student has previously worked on the materials indicated by the teacher). The content of these exercises in class also constitutes materials and susceptible to be part of the end-of-course test, regardless of whether the student has done and well all the deliveries. The overall score of these exercises will have a value of 40 percent of the final grade (dividing equally (20%) between the two seasons of the course in case of annual subjects). The teacher will spaecify in advance which exercises are evaluable.

The non-delivered exercises will not be recoverable later or for the second call.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

HYBRID TEACHING

If the academic authority determines it, this subject will be adapted to the hybrid teaching model established by the

Faculty of Law, through which face-to-face theoretical-practical classes will be taught in discontinuous weeks for

the student. To this end, the Secretary of the Faculty will divide the group into as many subgroups as necessary,

teaching in the classroom, at the time established for the subject, to one of the subgroups each week in accordance

with the calendar established by the Faculty, providing for the others, as a priority, follow-up of the class through

synchronous VIDEO CONFERENCE.

The contents, volume of work and evaluation are maintained in the terms initially foreseen in the academic guide.

NON-PRESENTIAL TEACHING

If the academic authority establishes the change in non-classroom teaching, this subject will be taught to all students

under the same conditions as those indicated for the non-classroom teaching part of the hybrid system.

The contents, volume of work and evaluation are maintained in the terms initially foreseen in the academic guide.
