

**COURSE DATA****Data Subject**

Code	35138
Name	Tourism and sustainable development
Cycle	Grade
ECTS Credits	4.5
Academic year	2023 - 2024

Study (s)

Degree	Center	Acad. year	Period
1317 - Degree in Tourism	Faculty of Economics	4	First term

Subject-matter

Degree	Subject-matter	Character
1317 - Degree in Tourism	27 - Tourism economics and policy II (AP Tour.dest.plan)	Optional

Coordination

Name	Department
SIMO TOMAS, PAULA MARIA	110 - Applied Economics

SUMMARY

The subject has an eminently pragmatic educational objective. It deals with real projects that in recent years seek to make their status as tourist destinations compatible with sustainable development processes in the territories. To do this, first introduce the concepts and arguments related to development and sustainable tourism. It constitutes a natural extension of the core subjects related to the planning and management of destinations.

PREVIOUS KNOWLEDGE**Relationship to other subjects of the same degree**

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Know the contents of the subjects related to public action in all its areas in the courses 1, 2, 3.

OUTCOMES

1317 - Degree in Tourism

- Analyse the economic dimension of tourism.
- Understand the dynamic and evolving nature of tourism and of the new leisure society.
- Recognise the main tourist agents.
- Evaluate tourist potentials and make the prospective analysis of their exploitation.
- Understand the legal framework regulating tourism activities.
- Identify and manage tourist areas and destinations.
- Manage the tourist territory according to the principles of sustainability.
- Understand a public plan and the opportunities that it affords for the private sector.
- Understand the functioning of destinations, tourism structures and their business sectors on a global scale.
- Know the objectives, strategy and public instruments of planning
- Know the main initiatives to enhance cultural heritage.
- Understand the characteristics of cultural heritage management.

LEARNING OUTCOMES

Students should know and act in the analysis and resolution of cases related to tourism activities in accordance with the principles and methods of sustainable development.

DESCRIPTION OF CONTENTS

1. How can sustainability facilitate development?

- 1.1.- Basic Concepts and Propositions
- 1.2.- Green economy
- 1.3.- Sustainability as a development model
- 1.4.- Analysis: Human Development Index
- 1.5.- New conceptual parameters

**2. How is sustainability incorporated into tourism activity?**

- 2.1 Sustainability as an element of destination differentiation and innovation.
- 2.2 Processes for integrating sustainability into tourism activities.
- 2.3 Case study 1: nature and sun and beach tourism.
- 2.4 Case study 2: urban and cultural tourism.

3. How to manage change from public policies and from the tourism company?

- 3.1 Changing the model of sustainable tourism production
- 3.2 The political practice for a sustainable tourism planning;
- 3.3 The shift of the tourism enterprise towards sustainability
- 3.4 Case study: Costa Rica, a sustainable tourism destination

4. How to plan a tourist destination in a sustainable way?

- 4.1 Tools and strategies for the planning of a sustainable tourism destination
- 4.2 Instruments and examples for the management of a sustainable tourism destination.
- 4.3 Professional future. Conclusions.

WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Classroom practices	15,00	100
Attendance at events and external activities	10,00	0
Development of individual work	10,00	0
Study and independent work	10,00	0
Readings supplementary material	10,00	0
Preparation of evaluation activities	15,00	0
Preparing lectures	5,00	0
Preparation of practical classes and problem	7,50	0
TOTAL	112,50	

TEACHING METHODOLOGY

From a teaching point of view, the course has two different blocks: theoretical classes and seminars/field trips. The use of tutorials and virtual classroom is also recommended.

Theoretical classes. The theory classes will be based on the professor's explanations (participative master

class), on the study of the basic and/or complementary recommended bibliography, and on the participation and competence of the students to debate on the subject matter of each class.

Likewise, in order to get the maximum benefit from the master class, students are recommended to prepare each topic, for which they are encouraged to make use of the bibliography provided. Likewise, other didactic resources provided by the teacher will be used. In each of the topics, the teaching resources are structured as follows:

- *Basic bibliography*, in which a series of manuals are indicated to adequately cover the topic in question in terms of points to be covered and level of depth.
- *Support readings* (recommended and for further reading). Their reading will allow students to have a much broader and richer vision of the contents of the subject exposed in class or addressed in the basic bibliography.
- *Internet addresses*, which aim to bring the student closer to institutions, associations or magazines to obtain current and real information and contact on issues directly related to the subject under study.

Seminars/field trips. There will be 4 seminars or field trips throughout the course of compulsory attendance. Students will have to prepare each activity in advance and make a report afterwards following the teacher's indications.

On the other hand, tutoring is considered to have several important functions that the students have to take into account: firstly, to solve doubts or comments in relation to the theoretical contents; secondly, to solve issues related to the different practical components of the subject; thirdly, to guide the students in the expansion of knowledge on topics that arouse their interest.

EVALUATION

The evaluation criteria are as follows:

	Maximum qualification	Minimum grade
Final test	6	2,6
Seminars and field trips	4	1,6

- All activities are compulsory.
- The final grade will be the result of the sum of the partial grades. However, in order to be eligible for the final grade, it is **REQUIRED** to reach the minimum scores indicated in the table. Any score below these minimums will result in an overall failing grade.
- There is no possibility of doing complementary activities to "raise the grade".
- For the second call, the grade of the parts that have exceeded the minimum grade will be

maintained, with the exception of the continuous evaluation, which is not recoverable.

- According to article 11.g of the Law 3/2022, of February 24, of university coexistence, regarding the use of artificial intelligences (AI) as ChatGPT, it will be considered a very serious fault to plagiarize totally or partially a work, or to commit academic fraud in the elaboration of any work or activity requested to the students. Academic fraud will be understood as any premeditated behavior aimed at falsifying the results of an exam or work, their own or others (including the misuse of AI), made as a requirement to pass a subject or accredit academic performance.
