TEACHING METHODOLOGY

Theoretical contents: The professor will expose and explain the fundamental theoretical contents to guide the student in the study and understanding of the matter. The student must engage actively in the learning by means of the previous reading of the lesson and the supplementary materials established in the planning of the course.

Activities: comment of sentences, verdicts and proposals of practical cases deploying the competences and complementing the theoretical contents. The professor will decide which ones will be assessed.

Supplementary activities: extra activities will be programmed such as workshops, seminars and other activities. They will be planned considering the availability of human and temporary resources and trying to make them interdisciplinary making groups belonging or not to the subject. These activities may take place in centres outside the Universitat de València.

EVALUATION

Composition of the final grade:

- 30 % CONTINUOUS EVALUATION
- 70 % EVALUATION OF THEORETICAL AND PRACTICAL KNOWLEDGE

Computable activities for the continuous evaluation. - In the CONTINUOUS EVALUATION the follow-up and the preparation of the content of the programme will be assessed. There will be AT LEAST TWO TASKS that will be assessed. They will consist mainly in the resolution of cases, an objective test, individual work or in group, etc.

In any case, professors can carry out additional activities for continuous evaluation that will be documented in the corresponding Annex to the Course Guide.

The continuous evaluation means assistance and participation. Those students that by diverse reasons cannot attend the lessons do not have right to a different continuous evaluation.

Punctuation of the continuous evaluation. – No marks will be awarded in the continuous evaluation if the student does not get AT LEAST 40% in this modality. In consequence, students who don't get at least 40% will have a final score of zero points in the continuous evaluation. The objective is to promote the continuous work.

The continuous evaluation will compute both in first and second calls.

The activities of the continuous evaluation are “no recoverable” in the second call.

Modality of the final test. - The modality of the FINAL TEST of knowledge (test, short questions or questions to be developed, both theoretical and theoretical-practical, oral examination, etc.) will be decided by each professor and will be communicated to the students in advance.

In case of coincidence of examinations, the type of examination may vary (e.g., test, oral, writing).

Need to pass the Final Test.- To pass the subject it is COMPULSORY to PASS THE FINAL TEST.

Students who participate in an activity of the continuous evaluation, but do not take the final test in any of the calls, will be considered as NO PRESENTED in the records of the corresponding calls of the subject.

Qualification in case of having no marks in the continuous evaluation. - Those students that do not participate regularly in the activities of the continuous evaluation will be assessed according to the result of the final exam, which is open to all the students. In such case, the maximum score they can get is 7 out of 10.

Qualification in case of automatic cause of fail. - According to the criteria of this Course Guide or of the Annex of each professor, the maximum mark will be 4 points.
