Theoretical content: The teacher will present and explain those fundamental elements that should guide students in the study and understanding of the subject. The student, meanwhile, should actively engage in the learning process through reading, before the teacher's explanation, or in class, depending on the organization of teaching time, those materials, textbooks, monographs and texts provided or previously indicated.

Applied activities: They consist in the comment of statements or press news, case resolution or activities like puzzle or questionnaires, analysis of labor issues, etc., through which students will develop the skills mentioned above.

These activities may either be complementary to the exposure of theoretical knowledge by the teacher, or focus on specific issues of the subject that will not be subject to exposure by the teacher.

These activities should be participatory and each teacher will indicate, where appropriate, which will be evaluated.

Through them the student will be introduced to and accustomed in the handling of those materials and techniques of the discipline.
