**SUMMARY**

This course is located in the itinerary of the fourth degree course on Private Law.

Its main objective is that the student knows the Spanish civil liability. This exhaustively analyzes the various regulations of the former as the source of the damage (contractual or not, criminal or not a criminal offense) and, especially, the budgets for the incurrence of the obligation to indemnify. Namely: the behavior, damage, causation (with emphasis on the allocation criteria objective) and subjective criteria applied (iguilt, dolo and risk). In addition, we study the cases where a subject (parents, guardians, employers) may be required to answer for the damage caused by another (children, pupils, employees), that is, the so-called vicarious liability, and cases they are liable for damages caused by animals or things. Moreover, given its enormous practical significance, analyzes the tort system of public administration (which in Spanish law has a very broad and generous recognition) and other assumptions that have a special regulation (defective products,energy nuclear, etc.).

Moreover, as we must not forget that to compensate for damage caused is a civil obligation, we analyze the budgets of the same, for which the student will have to link it and place it back into the general category of obligation, studied in Civil II
