SUMMARY

The subject's goal is to provide students with advanced resources for the syntactic and textual analysis of linguistic productions in Italian, with particular attention to the oral environment. The operational concepts of different linguistic currents, according to the GGIC model, with the prevalence of a synchronous perspective, shall apply. The points of greatest divergence between the Italian language system and those of the Iberian-romance domain will be specifically addressed.

Likewise, the subject will contribute to the development of communicative skills in the Italian language up to the C1 CEFR level, with special attention to the stylistic adequacy of the different discourses (colloquial, formal, academic, in the written and oral records).

This subject is taught in Italian.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

This subject is the third of a group dedicated to "Linguistic studies in the Italian language". Students are expected to have passed the two previous levels.

Knowledge of the Italian language corresponding to the B2 level of the CEFR is recommended.

OUTCOMES

TEACHING METHODOLOGY

The concepts and analytical procedures associated with the subject will be presented frontal lectures, reinforced with the analysis of cases and activities on real examples, both in the oral and written environment. In these activities, students will be invited to solve problems related to the subject, exposing –where appropriate– the results of work carried out individually or as a group.

The lecturer will indicate, where appropriate, which conferences organized by the Departamento de Filología francesa e italiana the students should attend.

EVALUATION

Learning will be assessed in two ways:

Mode	Weight on the final note
Continuous assessment	50%
Final work	50%

Continuous assessment

Includes assessment of classroom activities and partial exams after concluding each topic of the subject.

Students will be monitored during classroom activities (see above) focusing on problem solving and on the exposure of results in the Italian language.

When concluding each topic, control tests of the acquisition of contents will be carried out, in the form of theoretical-practical exercises based on real examples.

The continuous assessment will account a 50% of the final grade.

The minimum attendance for being assessed in this modality is 80%. Those unable to attend at the lectures must contact the teacher to agree alternative assessment modalities.

Final work or final exam

The final work shall consist of the analysis of a brief oral text (5'-7') provided by the teacher; it will serve to assess the overall knowledge achieved and the ability of students to apply it to specific cases.

It will account for 50% of the overall assessment.

Attendance at conferences organized by the Departamento de Filología francesa e italiana will be valued in this section.

The final work must collect the results of the personal work of the student who presents it. Plagiarism (unrecognized use of other people's materials) will result in the cancellation of the work.

Upon agreement with the teacher, the final work may be replaced by a final exam on the contents of the whole course. It will be theoretical-practical in nature, with the same evaluation objectives and the same weight in the final note as the final work.

To pass the subject you need:

Obtain at least 5/10 points as a result of the weighted sum of the results in the two modalities described. The minimum grade in continuous assessment shall be 4/10 points; in the final work or final exam, it will be 5/10 points.

Italian-speaking students should contact the teacher to agree on the modalities of their attendance at the course and the corresponding assessment.
