SUMMARY

Aborda el estudio científico y los conocimientos instrumentales de la lengua árabe moderna, con una introducción a las unidades básicas del sistema lingüísticas y comunicativas. Ofrece una panorámica de la lengua árabe en su funcionamiento, variantes socioculturales y evolución histórica, enmarcándola dentro de la familia de lenguas a la que pertenece y analizando sus relaciones con otras lenguas (influencias recibidas y ejercidas). En este sentido se relaciona con la historia o gramática histórica de la lengua española y catalana, con las materias referidas a lexicografía (española, catalana, italiana, francesa, inglesa, latina, griega). También es un complemento de materias de lingüística general que se refieran al funcionamiento de las lenguas o a las que contemplen distintas familias lingüísticas. Los objetivos básicos de la asignatura son:

- Leer textos árabes vocalizados.
- Escribir correctamente en alfabeto árabe.
- Utilizar las cifras y el sistema de transcripción del árabe al alfabeto latino.
- Conocer los fundamentos básicos de la morfosintaxis árabe.
- Conocer nociones de historia de la lengua árabe y de su familia lingüística.
- Conocer los usos onomásticos de los países arabo-islámicos y la influencia de la lengua árabe en el léxico y la toponimia peninsulares.
- Adquirir elementos de vocabulario de alta frecuencia y los rudimentos de árabe hablado que permitan tener diálogos sencillos con personas árabes cultas.

TEACHING METHODOLOGY

The temporary planning of teaching is established as follows (with possible variations required to the development of the classes):

- From September 11 to October 1 (Block I)
- From October 2 to November 5 (Block II)
- From November 6 to November 26 (Block III)
- From November 27 to December 22 (Block IV)

Theoretical-practical classes in person

The teacher will give the students the pertinent theoretical, methodological and bibliographic guidelines, while promoting:

- Active learning
- Participatory learning

The theoretical-practical classes will be combined with the publication of materials in the Virtual Classroom, registered presentations, videoconference tutorials and other teaching methods foreseen among those suggested by the UV and other methodological lines in teaching innovation for the development of the training-learning process .

EVALUATION

The evaluation system for the subject is Continuous Evaluation. Following the framework contemplated in the MECR, the 5 communication skills will be assessed: a. written comprehension; b. written production; c. oral comprehension; d. oral production; and, e. gramatic and vocabulary. For each of the skills:

(A) There will be a sufficient number of assessable activities for each of the skills throughout the course of the subject so that each student can obtain their grade by continuous evaluation (eg, solving exercises and problems, presentations synchronous or asynchronous, delivery of compulsory and optional tasks, written tests, participation, portfolios, etc.).

(B) The assessable tasks mentioned in point (A) will have to be developed within the teaching period that lasts for the subject stipulated in the UV calendar.

(C) The activities referred to in (A) will correspond to 100% of the final grade for the course and are distributed as follows:

1. Participation in class (from 10 to 25%)
2. Completion and delivery of tasks and activities (compulsory and optional) in class (from 25 to 90%)
3. Completion of work and / or written tests (from 25 to 90%)

The teaching staff in charge of the subject will decide the exact contribution of each of the parts (C1, C2 and C3) to the final grade during the first week of the course, always trying to get the students to participate in its preparation (with the aim of implementing the participation of students in everything that has to do with their teaching-learning process (teaching innovation). The percentage contribution decided will be published in the Virtual Classroom of the subject during the second week of the course for the knowledge of all the students of the subject.

(D) Regarding the tasks assessable in C2, there will be 2 types of tasks:

- Compulsory: they are the ones that will be computed for obtaining the grade in C2 by means of the relevant percentage average.

- Electives: they will be used to raise the overall final grade for the subject, as long as the final grade has been passed with a 5 out of 10. The summative amount will be obtained according to the average that results from the sum of all the optional tasks of the semester. The following list establishes the final points that can be achieved with the average of the sum of the optional tasks:

- - Average from 0 to 3.9 in optional tasks = 0 points
 - Average from 4 to 5.49 in optional tasks = 0.1 point
 - Average of 5.5 to 6.49 in optional tasks = 0.15 points
 - Average of 6.5 to 7.49 in optional tasks = 0.2 points
 - Average of 7.5 to 8.99 in optional tasks = 0.3 points
 - Average from 9 to 9.49 in optional tasks = 0.4 points
 - Average of 9.5 to 10 in optional tasks = 0.5 points

(E) Carrying out the activities is considered essential to achieve the objectives of the subject. The deadlines for delivery of mandatory activities (whether at the time, to be required in class; with a fixed deadline; etc.) must be strictly respected.

- Mandatory activities not carried out will count as 0; Those delivered after the deadline (and as the maximum delivery date, the last day of class) will count with a maximum grade of 5.

- The optional tasks may only be delivered until the deadline that is marked in each of them, counting with a grade of 0 those that have not been delivered or have been delivered after the deadline.

To establish the average, the minimum grade required in each of the communication skills is 4/10. If this minimum grade is not achieved in any of the competencies, the overall grade for the subject will be less than 5/10 points, failed.

(F) In the case of including a work or portfolio as part of the evaluation in C3, the delivery of this by the students should not exceed the term of the last face-to-face class in that subject.

(G) What is described in the previous points refers to the evaluation of the subject in the first call established by the UV. For subsequent calls, a student may be qualified with an exam.

(H) The overall grade for the subject will be the average of the marks obtained during the course according to the weights set in (C): $C1 + C2 + C3$.

To establish the average, only the grades passed with a minimum numerical grade of 5 out of 10 points will be taken into account within their respective average in each of the referred sections (C1, C2 and C3).

(I) The fraudulent performance in a test or activity will result in a grade 0 in it.

(J) The part of C1 will be taken into account from the active participation in class. Under art. 6 (general grading system will follow the regulations of the University of Valencia approved by the Consell de Govern on May 30, 2017. ACGUV 108/2017), this part will be fulfilled if a minimum of 80% of the the hours or the impossibility of attending the sessions due to force majeure has been adequately justified. It must be taken into account that the justification for an absence does not imply active participation, so this will only be taken into account when evaluating the minimum 80% of the hours. This percentage will be defined at the beginning of the course according to the official calendar.

The general rating system will follow the regulations of the University of Valencia approved by the Government Council on May 30, 2017. ACGUV 108/2017.

Intellectual honesty is vital to an academic community and for the fair evaluation of the student's work. All work submitted in this course must be originally authored by every student. No student shall engage in unauthorized collaboration or make use of ChatGPT or other AI composition software.
