TEACHING METHODOLOGY

The temporary planning of teaching is established as follows (always subject to possible variations required by the course of the classes and their contents):• From February 1 to February 17 (Block I)• From February 22 to March 10 (Block II)• From March 22 to April 19 (Block III)• From April 21 to May 5 (Block IV)• From May 10 to May 19 (Block IV)

Theoretical-practical classes in person

The teacher will give the students the pertinent theoretical, methodological and bibliographic guidelines, while promoting:

- Active learning
- Participatory learning

The theoretical-practical classes will be combined with the publication of materials in the Virtual Classroom, registered presentations, videoconference tutorials and other teaching methods foreseen among those suggested by the UV and other methodological lines in teaching innovation for the development of the training-learning process .

a) Activities in the classroomTheoretical classes: Theoretical presentation of each topic by the teacher.Practical classes: Exercises, listening, and production and co-production of oral texts. Production and co-production of basic texts.b) Non-attendance activities and work.b. Content tasks. Before the last school day of the subject, the compulsory tasks must be presented. These tasks complement those of the classroom and will be corrected in the classroom.c) Another activity is proposed that takes place in person in the classroom and outside of class (PBL project)In principle, the PBL method and the way of working in the classroom and outside are explained. How will they work? The teacher provides the material (text learning methodology problem), the text is read and analyzed. The aim is for students to verify their understanding of the case by reading it. Prior knowledge on the selected topics is provided. A group brainstorming is carried out on the learning interest. The tracks are set. A list of clues that are within the case must be made, so that the students begin to relate what is known, a list of what is known is made. Problems are set. The students establish which are the problems that are implicit in the difficulty of learning. A list of hypotheses or possible explanations is made. Students usually have theories or hypotheses about the causes of the problem. These must be listed and will be accepted or rejected depending on the progress of the method. Learning objectives are established. A list must be made of everything that the students must know to solve the problem. List of vocabulary and grammatical content for learning that they need to learn and to solve or understand. Then the sources of information are established. The teacher should guide the students to the sources of information, mentioning where the necessary information can be obtained. At the end of this session the students must have everything they have done, constituting the student's material. Check through a checklist of what is available. In the second session he begins to work. Information must be collected or obtained. The team must locate, organize, analyze and interpret information from various sources. Present results. The team delivers the work that is deemed appropriate (presentation of written texts and oral production...) in which they show the solution to the problem through a self-learning method.

EVALUATION

The evaluation system for the subject is Continuous Evaluation. Following the framework contemplated in the MECR, the 5 communication skills will be assessed: a. written comprehension; b. written production; c. oral comprehension; d. oral production; and, e. gramatic and vocabulary. For each of the skills:

- (A) There will be a sufficient number of assessable activities for each of the skills throughout the course of the subject so that each student can obtain their grade by continuous evaluation (eg, solving exercises and problems, presentations synchronous or asynchronous, delivery of compulsory and optional tasks, written tests, participation, portfolios, etc.).
- **(B)** The assessable tasks mentioned in point (A) will have to be developed within the teaching period that lasts for the subject stipulated in the UV calendar.

- **(C)** The activities referred to in (A) will correspond to 100% of the final grade for the course and are distributed as follows:
- 1. Participation in class (10%)
- 2. Completion and delivery of tasks and activities (compulsory and optional) in class (30%)
- 3. Completion of work and / or written tests (40%)
- 4. Project with ABP Methodology (20%)
- **(D)** Regarding the tasks assessable in C2, there will be 2 types of tasks:
- Compulsory: they are the ones that will be computed for obtaining the grade in C2 by means of the relevant percentage average.
- Electives: they will be used to raise the overall final grade for the subject, as long as the final grade has been passed with a 5 out of 10. The summative amount will be obtained according to the average that results from the sum of all the optional tasks of the semester. The following list establishes the final points that can be achieved with the average of the sum of the optional tasks:
 - Average from 0 to 3.9 in optional tasks = 0 points
 - Average from 4 to 5.49 in optional tasks = 0.1 point
 - Average of 5.5 to 6.49 in optional tasks = 0.15 points
 - Average of 6.5 to 7.49 in optional tasks = 0.2 points
 - Average of 7.5 to 8.99 in optional tasks = 0.3 points
 - Average from 9 to 9.49 in optional tasks = 0.4 points
 - Average of 9.5 to 10 in optional tasks = 0.5 points
- (E) Carrying out the activities is considered essential to achieve the objectives of the subject. The deadlines for delivery of mandatory activities (whether at the time, to be required in class; with a fixed deadline; etc.) must be strictly respected.
- Mandatory activities not carried out will count as 0; Those delivered after the deadline (and as the maximum delivery date, the last day of the class) will count with a maximum grade of 5.
- The optional tasks may only be delivered until the deadline that is marked in each of them, counting with a grade of 0 those that have not been delivered or have been delivered after the deadline.

To establish the average, the minimum grade required in each of the communication skills is 4/10. If this minimum grade is not achieved in any of the competencies, the overall grade for the subject will be less than 5/10 points, failed.

- (**F**) The delivery(s)/exposition(s) of C3 and C4 by the students should not exceed the term of the last face-to-face class in that subject.
- **(G)** What is described in the previous points refers to the evaluation of the subject in the first call established by the UV. For subsequent calls, a student may be qualified based on an exam.
- **(H)** The overall grade for the subject will be the average of the marks obtained during the course according to the weights set in (C): C1 + C2 + C3 + C4.

To establish the average, only the grades passed with a minimum numerical grade of 5 out of 10 points will be taken into account within their respective average in each of the referred sections (C1, C2, C3 and C4).

- (I) The fraudulent performance in a test or activity will result in a grade 0 in it.
- (J) The part of C1 will be taken into account from the active participation in class. Under art. 6 (general grading system will follow the regulations of the University of Valencia approved by the Consell de Govern on May 30, 2017. ACGUV 108/2017), this part will be fulfilled if a minimum of 80% of the the hours or the impossibility of attending the sessions due to force majeure has been adequately justified. This percentage will be defined at the beginning of the course according to the official calendar

The general rating system will follow the regulations of the University of Valencia approved by the Government Council on May 30, 2017. ACGUV 108/2017.
