SUMMARY

FINANCIAL ACCOUNTING – AN INTRODUCTION is a foundation course, taught in the first semester of the first year of the Degrees in BUSINESS ADMINISTRATION, ECONOMICS and FINANCE AND ACCOUNTING. This course is linked to the area of Business Administration and comprises six ECTS credits.

The subject is designed for beginners in the study of financial accounting. The course has a double perspective, theoretical and practical, for the understanding of the principles and concepts needed for the preparation and use of the financial statements. It is expected that at the end of the course the student: acquire a good understanding of the nature and objectives of the financial accounting; know how to prepare financial statements based on simple business transactions; and understand the principles of preparation of financial statements from an international perspective.

From a professional perspective the FINANCIAL ACCOUNTING is a key instrument in the development of a successful career, where the professional should apply different international strategies, with an increasing competence and the need to discriminate between numerous investment options. Moreover the professionals should study and adapt to the changes in the regulation and profession of accounting and auditing.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Sin requisitos previos.

OUTCOMES

1313 - Degree in Business Management and Administration

- Demonstrate capacity for analysis and synthesis.
- Have organisation and planning skills.
- Be able to make decisions.
- Be able to work in a team.
- Have critical and self-critical capacity.
- Be able to learn autonomously.
- Be able to adapt to new situations.

- Show creativity.
- Be able to coordinate activities.
- Be able to prepare and interpret accounting information, both financial, for external users, and internal, for management control and decision making.
- Be able to elaborate, interpret and analyse the financial statements of organisations, and to understand their implications for other business decisions and areas.
- Be able to evaluate the economic and financial consequences of the application of Spanish accounting standards.
- Be able to apply and introduce continuous improvement procedures in all areas of the organisation.

1330 - Degree in Business Management and Administration (Ontinyent)

- Demonstrate capacity for analysis and synthesis.
- Have organisation and planning skills.
- Be able to make decisions.
- Be able to work in a team.
- Have critical and self-critical capacity.
- Be able to learn autonomously.
- Be able to adapt to new situations.
- Show creativity.
- Be able to coordinate activities.
- Be able to prepare and interpret accounting information, both financial, for external users, and internal, for management control and decision making.
- Be able to elaborate, interpret and analyse the financial statements of organisations, and to understand their implications for other business decisions and areas.
- Be able to evaluate the economic and financial consequences of the application of Spanish accounting standards.
- Be able to apply and introduce continuous improvement procedures in all areas of the organisation.

LEARNING OUTCOMES

- To understand the objectives of financial accounting in order to be useful for its users in the decision making process
- To know the regulatory framework of financial accounting.
- To understand the characteristics of the double-entry bookkeeping system and the accounting cycle
- To know the accounting treatment of the basic elements in the financial statements: assets, liabilities, equity, incomes and expenses.
- To understand the contents of the documents which form the financial statements, their structure and the characteristics to be fulfilled in order to guarantee their usefulness in the users' decision making.

**WORKLOAD**

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Classroom practices	30,00	100
Attendance at events and external activities	0,00	0
Development of group work	0,00	0
Development of individual work	5,00	0
Study and independent work	40,00	0
Readings supplementary material	5,00	0
Preparation of evaluation activities	0,00	0
Preparing lectures	15,00	0
Preparation of practical classes and problem	15,00	0
Resolution of case studies	10,00	0
Resolution of online questionnaires	0,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

There will be a two-hour lecture plus a two-hour practice session per week, thus totalling four classroom hours per week.

Lecture slides and practice sessions guidelines and relevant materials will be uploaded onto the course's virtual classroom (www.aulavirtual.uv.es). Students are encouraged to participate actively in all classes, including lectures.

Should the students have any course-related queries, questions or feedback, or should they need any guidance or advice on practice assignments, they are encouraged to take advantage of the office-tutorial hours.

EVALUATION

This subject uses the following evaluation procedure:

1. A final test (written exam), which will consist of both theoretical questions and practical cases. A basic calculator may be used to take the exam. It is not allowed to use any data storage device.
2. Continuous evaluation, based on participation and involvement in the teaching-learning process, and it will be able to consider items such as questionnaires, individual or team practical activities, assignments, participation, attendance, among other aspects. This evaluation will be carried out taking into account the activities carried out during the course. Continuous assessment activities are

not recoverable.

The course assessment has two components:

- (A) A written exam, it represents the 75% of the final grade.
- (B) Continuous assessment, it represents the 25% of the final grade.
- The exam needs to obtain 5 out of 10 in order to be able to pass the course.

If the written exam is passed, the final assessment is the weighted average mean of the two previous components. If the exam is failed (less than 5), the final mark will never exceed 4.5 (out of 10).
