1314 - Degree in International Business	25 - Market analysis and its agents	Optional

**Coordination**

<b>Name</b>	<b>Department</b>
CUADRADO GARCIA, MANUEL	43 - Marketing and Market Research

**SUMMARY**

This course introduces the student into the marketing research process and its implications with the marketing decision making. In doing so, this course will cover the basic following topics: information and marketing, exploratory and descriptive research, qualitative and quantitative methods, information analysis and report preparation. Specifically, this course follows:

- To obtain a general perspective of the marketing research discipline, identifying its core and main interest areas, knowing its basic principles and methods, establishing connections among topics, and learning the marketing research jargon.
- To understand the role of marketing research in an organisation and in the society, explaining how marketing research interacts with all the functional areas within organisations.
- To develop individual and team working abilities, to improve communicational skill, and to learn to search and analyse different types of information resources.
- To analyse different marketing situations, understanding the problems an organisation may face, and suggesting surveys and actions to start solving them.

## PREVIOUS KNOWLEDGE

### Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

### Other requirements

## OUTCOMES

### 1314 - Degree in International Business

- Manejo de las técnicas informáticas necesarias para el análisis de los mercados.
- Capacidad de análisis de la información primaria y secundaria sobre el mercado nacional y los mercados exteriores.
- Capacidad de elaboración de informes presentando la información obtenida para la toma de decisiones de marketing.
- Generar, alimentar y controlar el Sistema de Información de Marketing de la empresa.

## LEARNING OUTCOMES

Be able to design and implement a market research process in order to gather information from different domestic and foreign market agents

Deal with both different research methods and gathering information techniques.

Implement different statistics techniques to obtain results from information previously gathered.

Be able to analyse results for marketing decision making.

## DESCRIPTION OF CONTENTS

### 1. Introduction to marketing research

- 1.1. Marketing Information System
- 1.2. Marketing research: definition and scope
- 1.3. Marketing research designs
- 1.4. Applications of marketing research

## **2. Marketing research process**

- 2.1. Problem definition and approach to the problem
- 2.2. Research design formulation
- 2.3. Fieldwork
- 2.4. Data preparation and analysis
- 2.5. Results presentation

## **3. Exploratory research**

- 3.1. Secondary data
- 3.2. Focus groups interviews
- 3.3. In-depth interviews
- 3.4. Projective techniques

## **4. Descriptive research**

- 4.1. Observation methods
- 4.2. Personal survey methods
- 4.3. Self-administered survey methods
- 4.4. Big data

## **5. Questionnaire design**

- 5.1. Definition and objectives
- 5.2. Steps in questionnaire design
- 5.3. Questions: type, order and wording
- 5.4. Designing online questionnaires
- 5.5. Pretesting

## **6. Scales of measurement**

- 6.1. Primary scales of measurement
- 6.2. Comparative scaling techniques
- 6.3. Non-comparative scaling techniques
- 6.4. Scale decisions and evaluation

## **7. Sampling and fieldwork**

- 7.1. The sampling design process
- 7.2. Non-probability sampling techniques
- 7.3. Probability sampling techniques
- 7.4. Sample size determination
- 7.5. Data collection process

**8. Data analysis**

- 8.1. Production of a dataset
- 8.2. Data analysis strategy
- 8.3. Descriptive analysis
- 8.4. Measures of association
- 8.5. Comparing means

**WORKLOAD**

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Classroom practices	30,00	100
Attendance at events and external activities	5,00	0
Development of group work	10,00	0
Development of individual work	10,00	0
Study and independent work	20,00	0
Readings supplementary material	5,00	0
Preparing lectures	20,00	0
Preparation of practical classes and problem	20,00	0
<b>TOTAL</b>	<b>150,00</b>	

**TEACHING METHODOLOGY**

The methodology used to teach and learn the theoretical concepts of this course combines the presentations given by the lecturer in the classroom with the reading and studying by the student of the recommended course book, readings and other resources. Therefore, the lecturer will present the main theoretical topics, illustrating them with up-to-date examples and developing some educational activities. At home, the student should use the course book to consolidate what has been explained in class. This task will also prepare the student to solve the surveys that will be dealt with in the practical classes.

The practical sessions will be devoted to the development of a survey that will show the real-life implementation of marketing research. Students have to participate actively and regularly in order to fully understand the application of theoretical marketing concepts. Both individually and in groups, students will have to do some of the activities programmed and hand in those reports that will be required.

Policy Statement: Students in this course are encouraged to responsibly use Artificial Intelligence (AI) tools for information analysis and research while upholding academic integrity and complying with ethical and legal standards.

## EVALUATION

The course Marketing Research will be assessed according to the following criteria:

The overall grade of the course will be obtained by weighing the grades of the theoretical and the practical assessments. Each part will account for 5 points. .

The **theoretical part** will be assessed by an online examination that will cover all the topics of the course outline and will account for 5 points over 10. Different objective questions (multiple choice, association questions and others) will have to be answered. **The student must obtain a minimum of 2.5 points in this theoretical part in order to pass the course**

The **practical part** will be assessed by:

A final online examination that will account for 3 points over 10. The students will have to answer several short practical questions referred to the marketing research process and real surveys. **The student must obtain a minimum of 1.5 points in the practical exam in order to pass the course.**

Course work (required short reports during the term) will account for 2.00 points. This cannot be retaken in the final exam.

Alternatively, students that cannot attend regularly the practical classes (official proof is required) should contact the lecturer/coordinator at the beginning of the term.
