SUMMARY

The business environment in the EU: policies and strategies is a 4.5 ECTS credit optional training subject assigned to the module of the Degree in Finance and Accounting. It is taught in the second term of the second year of that degree.

This subject aims to provide basic socio-economic knowledge about the organisation and functioning of the European Union. These aspects are part of the environment in which companies and organisations operate, so that their knowledge is of high interest for the exercise of the professional activity that this Degree authorises.

Regarding the contents of the subject, it begins with a study of the theoretical bases and the historical evolution of the European integration process; it is followed by an analysis of the external dimension and public finances of the EU, and ends with a study of the main community interventions in the markets.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

It does not have any kind of restriction

OUTCOMES

1315 - Degree in Finance and Accounting

- Adquisición de conocimientos socioeconómicos básicos del entorno europeo en el que se va a desenvolver la actividad profesional del estudiante y de las empresas en las que puede desarrollarla.
- Reforzamiento de conocimientos técnicos básicos adquiridos en los módulos básicos, especialmente en los relativos a teoría económica, estadística y política económica.
- Adquisición de competencias transferibles directamente a la vida laboral especialmente en el ámbito de las políticas europeas de apoyo a la Investigación, Desarrollo e Innovación.

LEARNING OUTCOMES

The results that the student is expected to acquire in this subject are the following:

- Ability to elaborate and publicly defend a business project that specifically incorporates the applicable community regulations.
- Ability to analyse the impacts of the policies attributed to the EU and its assessment to the several groups affected

(business organisations, trade unions, professionals).

DESCRIPTION OF CONTENTS

1. Evolution and institutional organization of the European Union

1. The great stages of the European integration process and the international context
2. The Community legal order
3. Community institutions

2. The Single European Market

1. Various types of economic integration and experiences in the world
2. Static and dynamic effects of the Customs Union
3. The Single Market, defense of competition and competitiveness policies

3. The European Monetary Union

1. Benefits and costs of a Monetary Union
2. The European Central Bank and the single currency
3. Coordination of economic policies

4. The public finances of the European Union

1. Public intervention in a context with several levels of government
2. The general budget of the EU: Expenditure and revenue
3. The 2014-2020 multiannual budgetary framework

5. The Common Agricultural Policy (CAP)

1. Origin and functioning of the traditional CAP
2. Efficiency and costs of the traditional CAP
3. The reforms and the current CAP

6. Regional and cohesion policy

1. Regional disparities in the EU
2. Community regional policy: principles and operation
3. Evaluation of results and challenges for the future

**7. The external dimension of the European Union**

1. The importance of the EU in the global context
2. The EU's external trade policy
3. The policy of cooperation for development

WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	30,00	100
Classroom practices	15,00	100
Development of group work	3,00	0
Development of individual work	5,00	0
Study and independent work	20,00	0
Readings supplementary material	4,00	0
Preparation of evaluation activities	20,00	0
Preparing lectures	5,00	0
Preparation of practical classes and problem	5,00	0
Resolution of case studies	5,00	0
TOTAL	112,00	

TEACHING METHODOLOGY

The development of the subject is structured mainly around the theoretical sessions and practical sessions. Depending on the type of session (theoretical or practical) a didactic or other method will be chosen.

In the theoretical sessions, which last 2 hours, the main contents of each of the subjects that form the subject will be presented, introducing the concepts and contextualising them to the different fields of application of the socioeconomic environment.

The predominant teaching method in the theoretical classes will be the participatory master class. This methodology makes it possible to manage large groups of students in an organised manner, offering the advantages of a master class without limiting the participation of students and the teacher-student interaction. Attempt to encourage participation and discussion in the class, in order to offer the student a direct involvement with the content.

In the practical sessions, which last 1 hour, the teacher will propose to the students situations that they must solve by applying the theoretical concepts learned. These practical classes will be developed following different teaching strategies based on the contents discussed in the corresponding theoretical session, although fundamentally they will be based on the analysis of current economic problems of the European and international environment, using appropriate materials in this regard. Its objective is to complement the concepts studied in the theoretical session by applying these to the resolution of practical cases. Likewise, in the practical sessions the professor will be able to propose one or several activities to be solved by the students that will cover the different topics of the subject, with the purpose that the

student acquires the competences enumerated in this academic guide.

EVALUATION

The evaluation of the students' learning in this subject will be done through a double process: a written exam at the end of the term, which evaluates the level of scope of the learning results and especially those focused on the specific competences of the subject regarding content and application; and the continuous evaluation of the practical activities developed by the student during the course, based on their participation and involvement in the teaching-learning process.

The written exam will consist of a part of test type questions and another with some essay questions, questions that allow assessing if students have assimilated the key elements of the program. This test will be 70% of the final grade.

The evaluation of the practical activities will be carried out continuously with the evaluation of exercises, works, memories, oral presentations, etc. This evaluation aims to develop the skills of students and stimulate daily work and will be based on an assessment of the follow-up made by students of the subject through participation in the classes. Will collectively 30% of the final grade. The activities linked to continuous evaluation will be non-recoverable.

The final grade will be the weighted sum of the evaluation of the written exam and the continuous evaluation of the practical activities. In any case, to pass the subject the student will need to obtain a minimum, which will be indicated in class by the teacher, in the written exam.

Students who do not participate in the continuous assessment may be evaluated in the exam and obtain a final grade of 7. In order to pass the subject, they must have obtained a minimum of 5 out of 7 points in said test.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

1. Continguts / Contenidos

La contenida en la guía docente

2. Volumen de trabajo y planificación temporal de la docencia./2. Volum de treball i planificació temporal de la docència

Las actividades son las mismas. Ahora simplemente se realiza un cuestionario de evaluación en línea al final de cada tema, aprovechando el tiempo de clase para ello.

3. Metodología docente/3. Metodologia docent

La docencia se imparte en Blackboard Collaborate TM en línea durante el tiempo habitual de clases.

Las tutorías siguen siendo las mismas y se realizan en Skype Profesional o respondiendo a los correos electrónicos.

4. Evaluación

La evaluación continua pasa del 30% a ser el 50% de la calificación. Dentro de este 50% hay una parte evaluable mediante cuestionarios en línea, que representa el 10%, y el resto de las actividades de evaluación continua supondrán el 40% de la nota.

El examen final pasa a ser un 50% de la calificación, cuando antes era un 70%.

En caso de no superar la evaluación continua, esta será recuperable y los alumnos además de realizar los trabajos que se han solicitado a lo largo del curso y están en el aula virtual, tienen que hablar con el profesor y realizar un trabajo extra sobre alguno de los temas que figuran en el programa de la asignatura.

5. Bibliografia

Artículos de Dialnet

Materiales propios del profesorado (diapositivas de clase).

Artículos de Roderic.

Grabaciones en Blackboard.
