SUMMARY**English version is not available**

La asignatura “Periodismo radiofónico” se integra en el módulo de materias obligatorias, dentro del bloque Organización y producción informativas y su objetivo es que el alumno domine, desde el punto de vista de la producción radiofónica, los siguientes aspectos:

- 1.-Los modelos de programación radiofónica y los géneros del periodismo radiofónico de carácter informativo y sus procesos de realización desde la elaboración de la idea, pasando por su planificación, hasta la realización de un programa en condiciones para su emisión.
- 2.-Los aspectos formales y de contenido de los varios géneros periodísticos, así como las necesarias calidades del lenguaje verbal y sonoro.
- 3.-El lenguaje radiofónico.

- 4.-Los géneros informativos radiofónicos como el boletín informativo, el reportaje, el informe, la entrevista en profundidad, la crónica, la crítica, la editorial, así como géneros dialógicos como la encuesta, la mesa redonda, la rueda informativa y el debate, entre otros.
5. Tipo de formatos de programas informativos: el avance informativo, el boletín horario, el magacín informativo.
- 6.-Los elementos y recursos sonoros en los informativos.
- 7.-La planificación y la preparación en la radio: el guion radiofónico.
- 8.-La edición radiofónica.
9. Evolución de las TIC en la radio: la web radio.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

OUTCOMES

1334 - Degree in Journalism

- Students must have acquired knowledge and understanding in a specific field of study, on the basis of general secondary education and at a level that includes mainly knowledge drawn from advanced textbooks, but also some cutting-edge knowledge in their field of study.
- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.
- Students should be able to work as a team, communicate their own ideas and integrate themselves into group projects aimed at achieving results.
- Students should be able to adapt to technological and socio-occupational changes.
- Students should be able to obtain and select relevant information and sources in order to solve problems and elaborate on strategies.
- Students should possess the ability to organise and plan their tasks, performing them in an orderly manner and prioritising the journalistic processes in a logical manner.
- Students should be able to express themselves fluently and effectively in their own languages, as well as in a third language (preferably English), taking advantage of the linguistic and literary resources that are most appropriate for the different forms of media.
- Students should be able to search for, select, read, interpret and analyse both written and audiovisual texts and documents (analytically, synthetically and critically).

- Students should be able to experiment and innovate through the understanding and use of the applied methods and technologies.
- Students must be able to communicate in their own language through traditional forms of media (the press, photography, radio, television), through new combined forms (multimedia), through new digital forms (the internet), or through hypertextuality.
- Students must be able to use the communicative and informative technologies and techniques in different medias and combined/interactive systems (multimedia).
- Students must be able to perform the main journalistic tasks, develop them within thematic areas, and apply them to journalistic procedures.
- Students must be able to conceive, plan and execute informative and creative projects in different environments (mass media, digital environments, communication offices, etc.).
- Students must be able to design both formal and aesthetic aspects in written, graphic, audiovisual and digital media, as well as the use of computer techniques for the representation of facts and data through infographic systems.
