SUMMARY

The subject History of Political Thought II is a four-month subject of 6 credits that is taught in the second semester of the first year of the Degree in Political Science and Public Administration. Its character as a basic subject makes it fundamental among the different studies leading to the degree and, despite its autonomy, it is especially linked to other subjects of the degree, especially History of Political Thought I – first semester of the first year– or Theory and Contemporary Philosophy –fourth year–, but also the different subjects of Fundamentals of Political Science, whose contents are incomprehensible without having the theoretical baggage that contributes the study of political ideas and forms in their historical development.

The subject History of Political Thought II aims to address the study of thought and the great political theories from modernity to the present. To this end, we will enter into the study of the great milestones that have marked the evolution of political ideas during that period: from the theoretical knowledge of the approaches of the first liberalism studied in the subject History of Political Thought I, in this subject we will introduce ourselves in the study of the first critics of liberalism –Rousseau–, in the ideas contributed by the American revolutions –Madison, Hamilton, Hay-- and French –Siéyes, revolutionary liberalism, the Jacobins– which are the starting point for the study of the main currents of thought in nineteenth-century liberalism –Constant, Kant, Tocqueville, Bentham, Stuart Mill– and of counterrevolutionary reactions –Maistre, Donoso– or conservative –Burke–. The study of the democratization of liberalism will lead us, in turn, to the study of the emergence of elitist theories. We also address the ideological origins of the nationalist phenomenon in the nineteenth century – Herder, Fichte, Renan – and, in particular, the socialist and authoritarian alternatives to liberalism, all ideas that especially marked the history of the first half of the twentieth century.

From here, already located in the post-world war we will analyze the different currents of social-liberalconvergent thought and, on the other hand, the critical or alternative positions to it –neoliberalism, neoconservatism, critical theory, new left–. The crisis of the Welfare State, from the seventies, and the study of the different theoretical and practical answers that were raised allow us to place ourselves on the threshold of the XXI century before the phenomenon of globalization and the most relevant questions that are currently open to political theory such as, for example and among others, the crisis of the State, the quality of our democracies, the sustainability of our societies, gender equality or cultural conflicts in the world.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

No enrolment restrictions have been specified with other subjects in the curriculum.

OUTCOMES

1335 - Grado en Ciencias Políticas y de la Administración Pública

- Students must have acquired knowledge and understanding in a specific field of study, on the basis of general secondary education and at a level that includes mainly knowledge drawn from advanced textbooks, but also some cutting-edge knowledge in their field of study.
- Students must be able to apply their knowledge to their work or vocation in a professional manner and have acquired the competences required for the preparation and defence of arguments and for problem solving in their field of study.

- Students must have the ability to gather and interpret relevant data (usually in their field of study) to make judgements that take relevant social, scientific or ethical issues into consideration.
- Students must be able to communicate information, ideas, problems and solutions to both expert and lay audiences.
- Students must have developed the learning skills needed to undertake further study with a high degree of autonomy.
- Análisis de información para evaluar problemas políticos o de gestión pública y elaborar propuestas de mejora
- Pensamiento crítico.
- Trabajo en equipo.
- Aplicar críticamente las principales teorías y enfoques de la Ciencia Política y de la Administración Pública.
- Saber identificar, diseñar y transmitir mensajes e información política, especialmente discursos políticos y campañas políticas e institucionales a través de medios analógicos y digitales.
- Saber utilizar los métodos y técnicas de análisis cuantitativos y cualitativos, así como el método comparativo.
- Interpretar los marcos políticos y procesos históricos estableciendo análisis comparativos de cambio y de prospección futura.
- Saber distinguir los valores, ideologías, actitudes y pautas de comportamiento de los ciudadanos así como su evolución temporal.
- Conocer y saber analizar las características, causas y consecuencias de retos sociales contemporáneos: desigualdad de género, ciberseguridad y sostenibilidad del desarrollo.
- Aplicar críticamente las principales teorías y enfoques de género a las instituciones, actores y políticas públicas.

1. Know the main conceptions of Political Theory and its implementation in Political Science.
2. Know how to analyze the various aspects of political conceptions in relation to their respective society.
3. Know how to analyze the various aspects of political conceptions in relation to forms of political organization.
4. Know how to develop the critical spirit.
5. Know how to critically analyze political texts.

DESCRIPTION OF CONTENTS

1. LIBERALISM

Liberalism and Rousseau's democratic alternative to liberalism.-- The political ideas of revolutionary liberalism.-- The Germanic theorization of the liberal state.-- Utilitarian liberalism.-- The radicalization and democratization of liberalism.-- Resistance to change: conservatism and reaction.-
- The emergence of nationalism as an ideology.

2. THE CRISIS OF LIBERALISM

The elitist alternative to the crisis of liberalism.-- Revolution as overcoming the liberal state: the different currents of socialism (communism and social democracy) and anarchism.-- The anti--democratic challenge to the liberal state: nazism, fascism and communist totalitarianism.

3. WELFARE LIBERALISM

The social--liberal consensus and the thesis of the end of ideologies: the welfare state.-- The construction of an alternative thought: the new left and the new right.-- The emergence of new ideological approaches: pacifism, environmentalism and feminism.-- Resistance to the disappearance of the Welfare State: from John Rawls to the Third Way.

4. THE IDEOLOGICAL DEBATE TODAY

Political ideologies on the threshold of the XXI century: from the thesis of the end of history to the problems of globalization.- Democratic theory and ideological debate: the state of the matter.

WORKLOAD

ACTIVITY	Hours	% To be attended
Theoretical and practical classes	60,00	100
Attendance at events and external activities	3,00	0
Development of individual work	12,00	0
Study and independent work	15,00	0
Preparation of evaluation activities	20,00	0
Preparing lectures	20,00	0
Preparation of practical classes and problem	20,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

The teaching methodology in the subject History of Political Thought II is based on the following five types of activities:

- Master classes;
- Classroom practices: text analysis, directed discussions, presentations and similar activities;
- Practical works outside the class: readings and analysis on "classic" works of political thought;
- Complementary activities: cineforum, conferences, round tables and other similar ones; and
- Study and autonomous work (unguided): previous preparation of the sessions of theory, reading of texts, collection and analysis of the information.

The theoretical-practical character of the History of Political Thought II course allows the questions of the program to be treated from this double and complementary perspective: the theoretical reflections provided by the teacher and the work of the key texts of political thought by the students. In the theoretical classes, the transmission of knowledge will be carried out mainly through the masterclass. The teacher will try to transmit the essential contents of the subject approaching them to the reality by the means of the examples, use of selected texts and other materials.

At the same time, the active participation of the students will be demanded, which can be realized –in addition to the daily dynamics of the class– in exhibitions or debates on certain topics, both in theoretical classes and in practical ones.

Students must do a previous study reading on the contents scheduled for each session; for this purpose they will use the recommended manuals and scientific articles; to the explanations of the teacher in the theoretical classes in the case of practical classes; and to the reading of the recommended original texts or other complementary works when indicated by the teacher of the subject. The texts of the chosen authors and their analysis constitute a fundamental point of support in the development of the program. The practices, except for works that are carried out outside the classroom at the direction of the teacher, will be elaborated and debated in the course of the practical classes, having to deliver the work done at the end of each practical class.

The tutorials will be carried out individually or, when the circumstances require it, in a group in order to solve doubts, attend problems in relation to the subject, direct the works demanded, among other reasons that require it.

A minimum of one complementary activity will be carried out outside the teaching hours. This or these may consist of the screening of films, conferences, workshops and seminars, as well as institutional visits that will be announced throughout the course. The complementary activities will be carried out preferably in the day or days and time slots assigned by the Faculty for this type of activities.

EVALUATION

The evaluation of the subject is composed of two elements, both in the first and in the second calls:

a) Examination: at the end of the course there will be a final test on all the contents of the subject, whether they have been taught in the classroom or not, and the materials that are understood in the various sessions. This test will have a value of 60 percent of the overall grade. In order for the value of this part to be added to that of the continuous evaluation (of the practical sessions and work carried out during the school year), the student must have obtained at least a 4 (out of 10).

b) Continuous Evaluation /Practices: Throughout the semester practical work and complementary activities of various kinds that must be delivered in the class on the day of its realization will be carried out (normally they will require that the student has previously worked the materials indicated by the teacher). The content of these practical works in class also constitute materials and contents of the course, so it can be susceptible to be part of the end-of-course test, regardless of whether the student has made all the deliveries well. Practices will be worth 40 percent of the final grade. The teacher will inform in a timely manner of which exercises will be evaluable.

The practices not carried out and the qualification obtained in those carried out, due to their nature of continuous evaluation activities, will not be recoverable later nor for the second call.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

HYBRID TEACHING

If the academic authority determines it, this subject will be adapted to the hybrid teaching model established by the Faculty of Law, through which theoretical-practical face-to-face classes will be taught in discontinuous weeks for the student. To this end, will proceed by the Secretariat of the Faculty to the division of the group in as many subgroups as necessary, imparting in the classroom, in the schedule established for the subject, to one of the subgroups in each week in accordance with the calendar established by the Faculty, foreseeing for the others, with priority, follow-up of the class through synchronized videoconferencing.

The contents, volume of work and evaluation will be maintained in the terms initially foreseen in the academic guide.

NON-FACE-TO-FACE TEACHING

If the academic authority establishes the change in non-face-to-face teaching, this subject will be taught for all students in the same conditions as those indicated for the non-face-to-face teaching pate of the hybrid system.

The contents, volume of work and evaluation will be maintained in the terms initially foreseen in theacademic guide.
