| RAMOS VALERA, MANUEL | 359 - Philosophy |

## SUMMARY

Overview of the fundamental philosophical currents and their reference authors throughout the nineteenth century.

## PREVIOUS KNOWLEDGE

### Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

**Other requirements**

Although it is not an essential condition not to have studied the subjects History of Modern Philosophy I and II, it would be convenient to have studied both, because it is a subject whose contents are decanted in direct dialogue, often critical, with modern thought.

**OUTCOMES****LEARNING OUTCOMES**

- 1.- Introduce students to the context of genesis and development of modern Western philosophical thought.
- 2.- Make known the main texts, authors, theories, and current trends of modern philosophy.
- 3.- Work directly on some of the most significant philosophical sources of this period and to be able to understand, interpret and critically analyze them.
- 4.- Discover the main philosophical problems that arouse during this time, and relate them to the main events and characteristics of their time.
- 5.- Help students to acquire the hermeneutical keys from which to interpret the most important texts of modern philosophy.
- 6.- That the students can reflect on the training process in which he/she is and orient himself/herself in his/her professional future, based on elements provided by the subject.

**WORKLOAD**

| ACTIVITY                                     | Hours         | % To be attended |
|--|---------------|------------------|
| Theory classes                               | 30,00         | 100              |
| Seminars                                     | 15,00         | 100              |
| Tutorials                                    | 5,00          | 100              |
| Development of individual work               | 15,00         | 0                |
| Readings supplementary material              | 15,00         | 0                |
| Preparation of evaluation activities         | 30,00         | 0                |
| Preparing lectures                           | 30,00         | 0                |
| Preparation of practical classes and problem | 10,00         | 0                |
| <b>TOTAL</b>                                 | <b>150,00</b> |                  |

## TEACHING METHODOLOGY

1. Face-to-face classes: there will be two hours of theoretical classes, taught by the lecturer and in which students can actively participate.
2. Preparation of theoretical classes: students will have to attend the theoretical classes having read the material that the lecturer has recommended for each session, both with regard to the classic texts and the basic secondary bibliography. This previous work is essential for the good follow-up of the classes and for the desirable active participation of the students in their development.
3. Practical classes: the class group will eventually be divided, depending on the number of students enrolled, into two groups of practices, and each one will attend scheduled face-to-face classes, which are one hour per week. Occasionally these hours can be grouped together and done two hours in a row every two weeks. These classes, conceived as a complement to the theoretical explanation of the contents of the subject, will follow the model of analysis and comment on texts directly related to the subject developed by the lecturer in the theoretical classes.
4. In order to evaluate the competences acquired especially in practical classes, all students must carry out and present for evaluation an essay or original individual work on a text or subject previously agreed with the lecturer, whose grade will be part of the final grade.
5. Tutorials. There will be two types of tutorials, some scheduled for the preparation and supervision of practical work and others for consultations.

## EVALUATION

The final grade for the course will reflect the qualification of the written exam in which the contents, competencies and skills developed in the theoretical and practical face-to-face classes will be evaluated, and the qualification of the original essay.

Written test: the qualification of the written test will account for 80% of the final grade (up to 8 points out of 10).

Original essay: the essay grade will represent 20% of the final grade (up to 2 points out of 10).

In summary, the composition of the final grade will follow this table:

Written test: 80%

Original essay: 20%

**TOTAL 100%**

To pass, students will necessarily have to take an exam, in which they will have to demonstrate the acquisition of the skills exercised in the theoretical and practical face-to-face classes, and present the aforementioned original essay.

In order to add the points obtained in the essay, students must obtain at least a 4 (out of 8) in the exam.

If the students do not deliver the essay, they will be graded as NOT PRESENTED, keeping the grade obtained in the exam until the presentation of the said essay within the two official calls of the academic year. At that time, the above criteria will be applied and they will be graded.
