Development of group work	4,00	0
Development of individual work	4,00	0
Study and independent work	6,00	0
Readings supplementary material	2,00	0
Preparation of evaluation activities	6,00	0
Preparing lectures	4,00	0
Preparation of practical classes and problem	5,00	0
Resolution of case studies	10,00	0
Resolution of online questionnaires	4,00	0
TOTAL	75,00	

TEACHING METHODOLOGY

The teaching methodology of the course includes: 1. Theory and Practice 2. Tutorials 3. Proof: From self-assessment and examinations The theory of individual learning units will be exhibited schematically in Power-Point as it is sufficiently developed in basic reading materials recommended. The material is specifically designed by the teachers, and includes the theoretical explanation of the topic, examples, tables, etc.. There will be practical activities in some of the subjects of the program. In the tutorials, the coordinator of the course will address all those doubts about the general subject students may have and also establish the general guidelines of the subject. The specific questions contained in each of the teaching units may be served through the electronic tutorials.

EVALUATION

The evaluation system will consist of a continuous assessment based on the following aspects: assistance to the theoretical and practical module (20% of the total grade), development and delivery of individual reports relating to the implementation of case studies / performance online questionnaire on the subject and participation, interest in the module, attitude to the matter and possibility of attending a seminar related to the contents of the module. The preparation of the reports made according to the criteria and guidelines set by the teacher of the module. The teacher may consider the need for some or all of the students have to conduct a final review of the module, in the event that the quality of reports submitted is insufficient.

Policy for the use of Artificial Intelligence (AI). A paragraph should be included at the end of any task that uses Artificial Intelligence, explaining what it has been used for and what instructions have been applied to obtain the results. Failure to do so will violate the academic honesty policy and will be considered plagiarism. In fact, according to article 11.g of Law 3/2022, of February 24th, on university coexistence, regarding ChatGPT, it shall be considered a very serious offense to fully or partially plagiarize a work, or engage in academic fraud in the preparation of any assignment or activity requested of the students. Academic fraud shall be understood as any deliberate behavior aimed at falsifying the results of an exam or assignment, whether it is one's own or someone else's (including the improper use of artificial intelligence such as ChatGPT), carried out as a requirement to pass a subject or demonstrate academic performance.
