SUMMARY

This course addresses the serious study of Supreme Social and Voluntary Action, from a multidisciplinary perspective, drawing on both theoretical and practical. This covers the legal, human resources and management. This is complemented by the invaluable contribution of the institutions themselves and the presentation of their practice and daily reality. These social enterprises and voluntary organizations active in the provision of social welfare services, especially for socially disadvantaged groups such as: the elderly, disabled, children, and also the attention to the vulnerability and social exclusion.

The history and the deployment of what is known as the welfare state is recent, just sixty years, for centuries, have been the associated entities and foundations that have been responsible for social action services offer different types of marginalized social groups economically. Under the substrate and within the mature welfare states, currently a resurgence happening these entities under widely varying models of collaboration with the public offering of social welfare. The recent Law 39/2006, the Promotion of Personal Autonomy and Care for dependent people, has become a priority for the different social actors

and public officials, fertile ground for the use of trained professionals matter. The traditional triad of being described by authors like Esping-Andersen, in which the family the state and the market took care of the needs of citizens, is giving way, in postindustrial societies, the incorporation of the third sector as a increasingly important element, so it is essential to know the role they have played Entity for Social Action and all that can happen to occupy in the near future.

TEACHING METHODOLOGY

The learning module is organized by:

- Theoretical and practical classes.
- Seminars on practical experiences (workshop experiences).
- Tutorials.
- Evidence of evaluation: test and test performance of work.

1. The theoretical part will be developed through lectures supported telematic elements (ppt, excel ...), and based on and supported by the Basic and complementary bibliography for each topic and specific reading materials will be provided to students through the virtual classroom. It was also positively valued student participation throughout the theoretical sessions, participation may consist of personal reflections and student evaluations of the concepts and theoretical contents spilled by the teacher.

2. The practical part will be developed through sessions based on the active participation of students through case studies concerning specific aspects of the reality of EASV, and studied in the theoretical module. Information concerning the case studies to work in class will be provided to students through the virtual classroom, so that the student will read and analyze this information in advance of the conclusion of the practice session and proceed to search for information supplementary information which may be helpful for the resolution of the practice. The practices must be planned and performed in groups. The practical part will be supported by the resource-based seminars which will be shown to the concrete experience of EASV national or Community.

3. In the tutorials, the coordinator of the course will address all those doubts about the general subject students may have and also establish the general guidelines of the subject. The specific questions contained in each of the teaching units may be served through the electronic tutorials.

EVALUATION

The final qualification of the subject will be obtained through the completion of a final exam and practices and completion of a work. The composition of the final grade for the course will be as follows:

- 40% for the Course Work part (internships and work)
- 60% for the final exam

The written test will consist of a multiple choice part and another part of short questions to develop. In the multiple choice test, the erroneous questions will be deducted as indicated by the teacher. It will be necessary to obtain a minimum of 3.5 points out of 10 in the test to be able to compensate with the grade for the course work.
