TEACHING METHODOLOGY

The teaching methodology will be online and the method of learning is self-training. Teaching units are contained in a self-formative tutorial hosted on a website. The address of the tutorial will be provided at the beginning of the course through the Virtual Classroom. The auto-evaluation activities are included in the tutorial and its purpose is to practice and consolidate learning. In some units may offer alternative activities to the topic of student research. The students will have channels of communication with the trainers:- Forum questions, which will be active during periods in which the subject is developed and accessed through the Virtual Classroom- Email infobibsoc@uv.es, to which they can direct their questions about the subject. To access the databases from outside the University is essential that students have a virtual private network (VPN) installed. The instructions are to configure the website Servei d'Informàtica: go now.

EVALUATION

The virtual module is not subject to assessment. The exercises are self-evaluative and are included in the tutorials themselves. However the completion and delivery of the final activity included in the tutorial to check the development, will be necessary. It will be corrected together in the first classroom session, at which they can be resolved doubts arising in their implementation. You can also have a positive impact on the final grade for the course II.1: Sources and Methodology: information skills for postgraduate methodological module.
