SUMMARY

The subject 'Family Change and Wellness' (6 ECTS) module is included in the contexts of family intervention to be completed with the subject 'Contexts family intervention'. It is the student's first contact with the Master of Social Welfare: Intervention group, social and family.

The transformation that families have experienced in recent decades has shown a host of new needs to cover. For the Social Work is essential to know the changes in family relationships and how they affect to the people's welfare. Consequently, this course aims to provide a panoramic view of the transformation of the family, especially about the greater diversity of family forms to which we are witnessing in recent years; focusing on the implications these changes have on their ability to supply welfare.

The course is divided into two large blocks of content:

- First of all, it presents the main elements of analysis to understand how the individualization is affecting family relationships and how it is affecting the welfare. We will approach family diversity in Western society, especially the Spanish, with the emergence of new family forms.

- However, this goal can't be achieved if not analyzed other areas closely related to the family especially in welfare provision: the market and the state. The relationships between family, state and market constitute a central element of this course. Consequently establish the foundation necessary to analyze the relationship between welfare and family diversity with special reference to the consideration that the family receives public administration, both in the field of social protection and legally.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Not required.

OUTCOMES

2170 - M.U. en Bienestar Social: Intervención Fam. 13-V.2

- Students can apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study.
- Students are able to integrate knowledge and handle the complexity of formulating judgments based on information that, while being incomplete or limited, includes reflection on social and ethical responsibilities linked to the application of their knowledge and judgments.
- Be able to access to information tools in other areas of knowledge and use them properly.
- Desarrollar la capacidad de iniciativa, pensamiento crítico y creatividad.
- Analizar críticamente los cambios sociales y su impacto en los diferentes grupos sociales, para el diseño de contextos y nuevos espacios de intervención eficaces.
- Saber incorporar la perspectiva de género en la planificación de las políticas de igualdad y antidiscriminatorias y, en las intervenciones sociales.
- Profundizar en el conocimiento de la complejidad y la diversidad de formas de vida y de vínculos en las familias.
- Reflexionar, seleccionar e integrar críticamente los conocimientos teóricos adecuados para la comprensión de las características de la realidad concreta en la que se interviene con familias.

The results obtained to study the course are:

- Acquisition of a comprehensive and critical perspective on family changes occurred in recent decades in Western society in order to have better tools for family and social intervention.
- Understanding the processes of transformation in family relationships and their impact on the welfare of citizens.
- Understanding the close relationship between social structure, family diversity and well-being of individuals.
- Having tools for analysis of social policies to protect existing families in our society, its character, its meaning and its impact on the population.

DESCRIPTION OF CONTENTS

1. New families, new needs

The module will focus on the explanation of the diversification process family is living in Western society in recent decades. The aim of the module is to know the characteristics and implications for the welfare of the people of the emerging family forms.

The module is divided into three sections:

- The diversification of family forms.
- The specificity of the emerging family forms.
- Family welfare and diversity.

2. Families: object and subject of welfare

The purpose of the module is to analyze families as welfare agents and relationship with other agents as suppliers of the welfare state, the market and society. We distinguish between the two basic functions of the family as welfare provider: economic resources and care.

Integrated thematic units in this module are:

- Child benefit. Family networks of support. Relationships between families and market. Social structure and child benefit.
- Family relationships and care. Provision of care and attention from the state. Market and care. Civil society and family associations. Social structure and provision of care.

WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	35,00	100
Theoretical and practical classes	5,00	100
Other activities	5,00	100
Development of individual work	25,00	0
Study and independent work	30,00	0
Readings supplementary material	25,00	0
Preparation of evaluation activities	25,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

The training activities will be based on:

MD1-Theoretical lessons participatory lectures.

MD2-Discussion of articles and other readings.

MD3-Addressed debate or discussion

MD6-Searching and documental analysis.

EVALUATION

The attendance is a prerequisite for evaluation and must cover a minimum percentage of sessions (90%). Below this minimum, unless valid reasons, the student will not be evaluated. Percentage of the final score: 10% (SE1).

The assessment of learning of knowledge will be done through the following instruments:

- Observation and recording the participative attitudes of the students in the development of the tasks and activities related to the competences. Weight of the final score: 25% (SE2)
- Individual report. Weight of the final score: 65% (SE5)

The individual report will consist of a maximum of 25 pages (Times New Roman, 12 point, single spaced) in which will be assessed:

- Application of learning in the subject, which will be implemented in the use of the basic bibliography and recommended by teachers.
- Capacity critical argumentation.
- Search other sources of information and selection criteria.
- Correction in written expression.

Structure of individual report:

- 1 - Cover: title, name of the Master's degree, the name of subject, name of the student, academic course, delivery date.
- 2 - State of the art.
- 3 - Developing the theme.
- 4 - Bibliography.
 - Summary of the four selected references.
 - References: References used in the report, ordered alphabetically (only those cited in the state of art or the development of the topic).
 - Other references. They include a list of references found on the chosen topic, which has not been used for report, ordered alphabetically.

The topic of the report will be communicated first to the subject coordinator, who may delegate the tutoring at the teacher most suitable. The report will be submitted in electronic format (pdf), with copy to the coordinator. The deadline for submission of the report will be the day fixed in the calendar of the Master's degree.
