SUMMARY

The Political Systems and Public Policies course is a 3-credit four-month subject that aims to provide students with the fundamentals to understand both the functioning of Political Systems and the formulation of Public Policies. In turn, the subject aims to train students so that they can relate the two thematic axes, Political Systems and Public Policies. The interests and objectives of the political actors integrated in the Political Systems or the forms of government, elected by different electoral systems in each country, have as one of their identifying variables the nuances that their representatives give to each of the variants of Politics. Public. For its part, the nuance that marks each Public Policy in an electoral contest,

Today more than ever in the face of political changes, the breakdown of bipartisanship in Europe and the emergence of the left in America and global geopolitical change due to the Chinese position and the Russia-Ukraine war, this course becomes relevant. The topics presented and discussed throughout its development, will help professionals to have theoretical knowledge under a critical and applied vision of national, European and world events in terms of Forms of government and their relationship with the application of Public Policies.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

No enrolment restrictions with other subjects in the curriculum have been specified.

OUTCOMES

LEARNING OUTCOMES

Academic Skills

According to the Ministry of Education, the competitions are all the activities that are carried out in the classes so that the student reaches a degree of integral performance. The subject, 44165, both with its content and its methodology, will train professionals with knowledge, skills and attitudes that will allow them to exercise their profession with a profile of information analysis, while at the same time transferring this analysis to the verification of both economic theory and the actual exercise of economic facts. With all this, the student, once the course is finished, will have acquired knowledge about the economic theory of political science theory and some of the necessary tools for applied analysis, they will also have developed skills for the interpretation, synthesis and analysis of that theoretical framework, writing and oral expression skills and the ability to work both autonomously and in a team. Thus, it is possible to highlight the overall vision that is transmitted to the student about the need for training that is not only cutting-edge,

On the other hand, the course Through the use of resources such as databases, reading articles in English, Valencian and Spanish, it develops key skills related to digital skills, linguistic and multilingual communication.

Learning outcomes

In this subject, master classes and activities are carried out that lead to the acquisition of the following knowledge and skills:
