- Identify ethical and professional standards in health psychology.
- Know the ethics regulation applied to the General Health Psychology.
- Learn to resolve these ethical conflicts in health practice.
- To acquire the skills necessary for the creation and management of companies.

DESCRIPTION OF CONTENTS

1. Health from a holistic perspective: scientific foundations and psychosocial

1 Introduction to the study of happiness

1.1 Concept of happiness

1.2 Phenomenology of happiness

1.3 Happiness statistics

2 Neuroscientific basis of happiness

2.1 The science of happiness

2.2 Concept of Neurohappiness

2.3 What happens in our brain when we are happy?

2.3.1 Neuroanatomy of happiness

2.3.2 Neurochemistry of happiness

2.4 Brain neuroplasticity and happiness

2.5 How can we be happier?

2.6 ¿We can reprogram our brains to be happier?

2.6.1 Thought

2.6.2 Emotion

2.6.3 Conduct

3 Neurohappiness applications in the field of health

- 3.1 What is happiness?
- 3.2 Neurohappiness applied
 - 3.2.1 The benefits of being happy in mental health
 - 3.2.2 Applications Neurohappiness in the field of mental health

- 4 Emotions and the immune system: stress response and meditation
 - 4.1 Buddhist contemplative tradition and neuroscience: the welfare and suffering
 - 4.2 Psychobiological stress response and suffering: endocrine, nervous and immune system
 - 4.3 Functional and structural modification nervous system as a result of the practice of meditation
 - 4.4 Adaptive stress response and meditation

2. The major life changes and their impact on health

- 1. Events, transitions and crises
 - 1.1 Conceptualisation
 - 1.2 Phases in the process of coping
 - 1.3 Factors that determine the coping
- 2. Focus on risk and resilience approach in the study of change
 - 2.1 Differentiating features of the approaches
 - 2.2 Characteristics of resilience and positive changes arising face adversity
- 3. Basis for the promotion of healthy coping change
 - 3.1 Intervention from the cognitive-behavioral model
 - 3.2 Intervention to promote resilience in traumatic situations
 - 3.3 Mindfulness-based intervention in major life changes
 - 3.4 ACT based Intervention in major life changes

3. Psychologist framework for action General Health: Basics and conceptual frameworks.

- 1. Legislation in force.
- 2. Empirical Evidence.
 - 2.1 Scientific foundations in Europe
 - 2.2 Scientific bases in Spain
 - 2.3 The Tiered Model in Primary Care
- 3. The role and functions of the General Health Psychologist
 - 3.1 The SEPCyS and the role of General Health Psychologist
 - 3.2 Discussion on papers about the role of General Health Psychologist

**4. Spanish legislation in the health field: Creating and managing companies**

1. The health legislation at the state level and regional Spanish.
2. Marketing of health professional services. Entrepreneurial skills.
3. Management companies and health services.
4. Creation and development of a Health Center: CRC.

5. Ethics and professional ethics in health psychology

3. Rules or ethical and / or ethical rules governing the proper practice of clinical psychology. Analysis of the specific code articles on the subject .Guide APA. BPS codes and APS

WORKLOAD

ACTIVITY	Hours	% To be attended
Theoretical and practical classes	60,00	100
Development of group work	10,00	0
Development of individual work	10,00	0
Study and independent work	20,00	0
Readings supplementary material	5,00	0
Preparation of evaluation activities	10,00	0
Preparing lectures	10,00	0
Preparation of practical classes and problem	10,00	0
Resolution of case studies	15,00	0
TOTAL	150,00	

TEACHING METHODOLOGY

Group learning with the teacher. In class attendance lecture model will be used, since this model offers the ability to provide an overview of the topic and influence those key concepts for understanding. Also, students indicate those most suitable for further preparation of the subject in depth resources.

Teaching is complemented by papers, individual and group, where self-employment is encouraged and group.

Ruled tutoring assistance. In the tutorials teachers guide students in building their knowledge; orient in the elaboration of the work, resolve doubts or difficulties related to the subject. They will be in groups to solve problems, to work, etc.

Virtual Classroom (<http://pizarra.uv.es>). In this virtual space, students can find documents relevant information or news subjects. Teachers deposited all the information they consider appropriate for the development of matter.

Most innovative as the case study teaching, solving exercises and problems, problem-based learning, project-oriented learning and cooperative learning using interdisciplinary groups in the practice sessions and in conducting group work.

EVALUATION

EVALUATION SYSTEM

Assessment of theoretical and practical contents by written test of response alternatives.

Attendance at seminars/conferences. Activities.

WEIGHING

Assessment of theoretical and practical content through written test of response alternatives (50% of the final score, recoverable). Attendance at seminars/conferences (5% of the final score, not recoverable).

Activities (45% of the final score). On second call, the activities that consist of tasks to be carried out outside the classroom will be recoverable. On second call, the activities that consist of tasks to be carried out in the classroom will be recoverable if their characteristics allow it.

MINIMUM REQUIREMENTS

To pass the subject in 1st or 2nd call, it will be necessary to achieve a minimum mastery of 50% in the valuation of theoretical and practical contents by means of written test of response alternatives (50% of the final score, recoverable).

RATING SYSTEM

The qualification of the subject will be subject to the provisions of the Evaluation and Qualification Regulations of the Universitat de València for degrees and master degrees (ACGUV 108/2017).

Only the different sections included in the evaluation will be added when the minimum requirements established.

The granting of an Honor Qualification will be based on the regulations regarding the University of Valencia, which takes into account the number of Honor Qualification per group. The evaluation of theoretical and practical contents by means of a written test of response alternatives will also include a development question that can be considered for the Honors Qualification (QH) award. In this regard, we will start with the number of MH that can be granted in each of the groups. Based on this, the possibility of granting the MH to the students will be assessed based on the total score obtained by the student on 10 points, and only in those cases in which the grade is 9 points or higher. In order to qualify for Honor Qualification, students must have completed the development question whose assessment will serve to determine the Honor Qualification assignment in those cases in which the students that can accede to it are superior to the ones of qualifications of honor that can be awarded and / or in case of a tie in the grade obtained by the student about 10 points.

The grade of the subject will incorporate the grade obtained in first call according to the following rules:

- If there is no qualification in the assessment section of theoretical and practical contents, by means of a written test of response alternatives, the grade will be NOT PRESENTED, regardless of attendance at seminars/conferences and of activities carried out.
- If there is a qualification in the assessment section of theoretical and practical contents by means of a written test of response alternatives, and this does not meet the minimum requirements, a SUSPENSIVE and numerical note will be recorded on base 10 of the qualification of this section.

In the second call, proceed according to the following rules:

- If there is no qualification in the assessment section of theoretical and practical contents, by means of a written test of response alternatives, the grade will be NOT PRESENTED, regardless of attendance at seminars/conferences and of activities carried out.
- If there is a qualification in the assessment section of theoretical and practical contents by means of a written test of response alternatives, and this does not meet the minimum requirements, a SUSPENSIVE and numerical note will be recorded on base 10 of the qualification of this section.
- If there is a qualification in the assessment section of theoretical and practical contents by means of a written test of response alternatives, and this meets the minimum requirements, the assessment for attendance at seminars/conferences and/or assessment of activities.

The consultation and challenge of the qualification obtained in evaluation tasks, will be subject to the provisions of the Rules of Challenging Qualifications (ACGUV of april 29, 2008).
