SUMMARY

The master job order arises as a factor enabling the / as students increase their skills in ways that are not easy to acquire with the typical structure of classroom lessons, such as: interacting with customers, develop formal specifications of problems , look over specialized literature on a topic, build prototypes, practice developing technical documentation and the oral defense of ideas.

The ability to solve problems in a study area, considering and evaluating alternative solutions to problems and being able to provide innovative solutions are encouraged.

The type of project to be developed can be very variable, but always within the guidelines set by the objectives and competencies established for the title of Master. In any case, it can be said that the ultimate aim is to apply the skills acquired during their studies to the research activity.

The contents of the field will be different depending on the specific objectives of the project selection.

The master work order will be performed in the manner indicated by the rules of the University of Valencia. The work may be experimental, bibliographic or coordinated research practices in companies or entities with equal dedication.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

Not applicable

OUTCOMES

2194 - M.U. en Nutrición Personalizada y Comunitaria

- Students can apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study.
- Students are able to integrate knowledge and handle the complexity of formulating judgments based on information that, while being incomplete or limited, includes reflection on social and ethical responsibilities linked to the application of their knowledge and judgments.
- Students can communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and non-specialist audiences, clearly and unambiguously.
- Students have the learning skills that will allow them to continue studying in a way that will be largely self-directed or autonomous.
- Students have the knowledge and understanding that provide a basis or an opportunity for originality in developing and/or applying ideas, often within a research context.
- Ser capaces de obtener y de seleccionar la información y las fuentes relevantes para la resolución de problemas, elaboración de estrategias y asesoramiento.
- Contemplar en conjunto y tener en cuenta los distintos aspectos y las implicaciones en los distintos aspectos de las decisiones y opciones adoptadas, sabiendo elegir o aconsejar las más convenientes dentro de la ética, la legalidad y los valores de la convivencia social.

- Know how to work in multidisciplinary teams reproducing real contexts and contributing and coordinating their own knowledge with that of other branches and participants.
- Participar en debates y discusiones, dirigirlos y coordinarlos y ser capaces de resumirlos y extraer de ellos las conclusiones más relevantes y aceptadas por la mayoría.
- Proyectar sobre problemas concretos sus conocimientos y saber resumir y extraer los argumentos y las conclusiones más relevantes para su resolución.
- Elaborar y manejar los escritos, informes y procedimientos de actuación más idóneos para los problemas suscitados y utilizando un lenguaje no sexista.
- Utilizar las distintas técnicas de exposición oral, escrita, presentaciones, paneles, etc., para comunicar sus conocimientos, propuestas y posiciones y teniendo en cuenta un lenguaje integrador e igualitario.
- Desarrollar y redactar resultados y/o publicar trabajos científicos en Nutrición.
- Conocer y aplicar los conocimientos y competencias adquiridas en el ámbito profesional en nutrición y alimentación.
- Adquirir el conocimiento que permita actuar en respeto a los derechos fundamentales y a los principios de igualdad.

To acquire the skills and research skills through a job that meets all the requirements and the requirements to be considered a proper investigation. Both its methodology and the content, so assume an original contribution to the field of knowledge in which the research has been developed.

DESCRIPTION OF CONTENTS

6. Master's Thesis

The final dissertation work is proposed as a factor enabling the / as students increase their skills in areas such as: interacting with customers, develop formal specifications of problems, be specialized in a subject bibliography, build prototypes, practice development technical documentation and the oral defense of ideas.

The type of project to be developed can be very variable, but always within the guidelines set by the objectives and competencies established for the title of Master. The ultimate aim is to apply the skills acquired during their studies to the research activity.

The contents of the course are related to Clinical Nutrition, Sports Nutrition and Food and Society.

WORKLOAD

ACTIVITY	Hours	% To be attended
Graduation project		100
TOTAL	0,00	

TEACHING METHODOLOGY

Development and evaluation of projects.

In addition, the contents of the module will be related to the Sustainable Development Goals (SDG). This is intended to provide students with knowledge, skills and motivation to understand and address these SDGs, while promoting reflection and criticism.

EVALUATION

The internship will be supervised by one or more tutors, some of them being university professors designated

Evaluation of the internship is based on the student's skills, related to Personal and Community Nutrition, using as indicators the report submitted.

The student must fulfill the following requirements to pass the subject:

- Attendance of tutorials and proposed activities.

Adequately fulfill the work plan proposed by the company supervisor.

- Having presented a final internship report;

- The university tutor will evaluate the student's learning based on the adequacy of the student's report and the criteria established by the tutor.

- The company tutor will assess, by means of a questionnaire, the skills acquired by the student. The company supervisor's evaluation will be based on attendance, the fulfillment of the tasks realized by the student, the degree to which the student has assumed responsibilities, the degree of satisfaction of the company/organization with the work performed by the student and the general evaluation of the tasks carried out by the student

REFERENCES

Basic

- Las obtenidas al realizar las búsqueda bibliográficas de artículos de revisión y experimentales de la temática seleccionada en las bases de datos, relativas a las actividades de la empresa.

ADDENDUM COVID-19

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

1. Contents

The contents programmed in the teaching guide are maintained.

2. Volume of work and temporary planning of teaching

Maintenance of teaching planning.

3. Teaching methodology

The teaching methodology that will be carried out electronically will be maintained.

4. Evaluation

The evaluation modality of this section is maintained, which can be carried out through the use of non-classroom teaching tools and which must be integrated into the Virtual Classroom.

5. Bibliography

The recommended readings are kept as they are available in databases that the UV has subscribed to (they require VPN in some cases).
