

**COURSE DATA****Data Subject**

<b>Code</b>	44203
<b>Name</b>	Sports nutrition
<b>Cycle</b>	Master's degree
<b>ECTS Credits</b>	7.0
<b>Academic year</b>	2023 - 2024

**Study (s)**

<b>Degree</b>	<b>Center</b>	<b>Acad. Period</b>	<b>year</b>
2194 - M.U. en Nutrición Personalizada y Comunitaria	Faculty of Pharmacy and Food Sciences	1	First term

**Subject-matter**

<b>Degree</b>	<b>Subject-matter</b>	<b>Character</b>
2194 - M.U. en Nutrición Personalizada y Comunitaria	2 - Nutrición deportiva	Obligatory

**Coordination**

<b>Name</b>	<b>Department</b>
SORIANO DEL CASTILLO, JOSE MIGUEL	265 - Prev. Medicine, Public Health, Food Sc., Toxic. and For. Med.

**SUMMARY**

Students will learn and apply the measurements applied in kinanthropometry and body composition, and skills to make a global assessment of the sport techniques; including stress testing, flexibility, endurance, speed, nutritional assessment and detection of eating disorders. Furthermore, the student will study the used ergogenic aids in sport, and hydration and dehydration, along with an overview of sports, functional and energy drinks will be considered.

**PREVIOUS KNOWLEDGE**

### Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

### Other requirements

Not applicable

## OUTCOMES

### 2194 - M.U. en Nutrición Personalizada y Comunitaria

- Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.
- Students should be able to integrate knowledge and address the complexity of making informed judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities associated with the application of their knowledge and judgments.
- Students should communicate conclusions and underlying knowledge clearly and unambiguously to both specialized and non-specialized audiences.
- Students should demonstrate self-directed learning skills for continued academic growth.
- Students should possess and understand foundational knowledge that enables original thinking and research in the field.
- Ser capaces de obtener y de seleccionar la información y las fuentes relevantes para la resolución de problemas, elaboración de estrategias y asesoramiento a clientes.
- Contemplar en conjunto y tener en cuenta los distintos aspectos y las implicaciones en los distintos aspectos de las decisiones y opciones adoptadas, sabiendo elegir o aconsejar las más convenientes dentro de la ética, la legalidad y los valores de la convivencia social.
- Know how to work in multidisciplinary teams reproducing real contexts and contributing and coordinating their own knowledge with that of other branches and participants.
- Proyectar sobre problemas concretos sus conocimientos y saber resumir y extraer los argumentos y las conclusiones más relevantes para su resolución.
- Planificar, ordenar y encauzar actividades de manera que se eviten en lo posible los imprevistos, se prevean y minimicen los eventuales problemas y se anticipen sus soluciones.
- Elaborar y manejar los escritos, informes y procedimientos de actuación más idóneos para los problemas suscitados y utilizando un lenguaje no sexista.
- Utilizar las distintas técnicas de exposición oral, escrita, presentaciones, paneles, etc., para comunicar sus conocimientos, propuestas y posiciones y teniendo en cuenta un lenguaje integrador e igualitario.
- Estudiar puntos anatómicos, proporcionalidad y composición corporal en el marco de la cineantropometría y la antropometría.

- Planificar estrategias de intervención para hidratar.
- Planificar por disciplinas deportivas las estrategias de intervención dietética.
- Conocer las diferentes ayudas ergogénicas.
- Adquirir el conocimiento que permita actuar en respeto a los derechos fundamentales y a los principios de igualdad.

## LEARNING OUTCOMES

English version is not available

## DESCRIPTION OF CONTENTS

### 2. Sport Nutrition

Kineanthrometry and body composition  
 Stress testing: Design and Interpretation  
 Mechanical, psychological, physiological and phytotherapeutic aids: An ergogenic approach  
 Pharmacological aids used in sports  
 Are there nutritional ergogenic aids useful?  
 Planning and scheduling the exercise  
 Tests for the assessment of muscular and cardio-respiratory endurance: theory and practice  
 Tests for the assessment of the strength and speed: theory and practice  
 Hydration and dehydration in sport  
 Sports and energy drinks and functional  
 Planning dietary aerobic and anaerobic sports  
 Eating disorders in sport

## WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	18,00	100
Classroom practices	15,00	100
Other activities	8,00	100
Seminars	6,00	100
Tutorials	6,00	100
Computer classroom practice	4,00	100
Attendance at events and external activities	6,00	0
Development of individual work	6,00	0
Study and independent work	26,00	0

Preparing lectures	32,00	0
Preparation of practical classes and problem	48,00	0
<b>TOTAL</b>	<b>175,00</b>	

## TEACHING METHODOLOGY

- Lectures, participatory lecture
- Resolution of case studies and case reports
- Seminars
- Project Development
- Project Rating
- Tour companies and NGOs
- Debate and discussion
- Expert Conference
- Working Group

In addition, the contents of the module will be related to the Sustainable Development Goals (SDG). This is intended to provide students with knowledge, skills and motivation to understand and address these SDGs, while promoting reflection and criticism.

## EVALUATION

A written test will be carried out at the end of each semester on the contents taught in the module sessions to guarantee knowledge and understanding of these.

It will be necessary to obtain a 5 or more in the final grade to consider the subject passed.

This evaluation will represent **100%** of the final grade for the subject.
