## SUMMARY

This subject starts from the pedagogical sense of mediation. Spaces such as family, school or community are ideal settings for the application of mediation as a socio-educational intervention strategy. Starting from a brief description of the beginnings and the legal framework in which it is based, the fundamental models and principles of the same are reviewed, emphasizing the basic singularities presented by the use of mediating techniques in the family context. Knowledge, analysis and experimentation of the process and techniques of family mediation occupy a central part in the subject, as well as the design and application of interventions from family mediation based on specific cases. Finally, it is intended to guide students in professional access to family mediation from the public and private sectors.
