Degree	Subject-matter	Character
2206 - M.U. en Contabilidad, Auditoría y Control de Gestión	1 - Higher accountancy	Obligatory

Coordination

Name	Department
PARDO PEREZ, FRANCISCA	44 - Accountancy

SUMMARY

The subject **business combinations and consolidation** studies the accounting treatment of business combinations, i.e. corporate transactions such as acquisitions, mergers and divisions. It also provides the concepts and techniques necessary for the consolidation of the financial statements, that is, the presentation of the annual accounts of corporate groups.

The **faculties in charge** of teaching in this subject are:

Dr. Francisca Pardo Pérez, Departamento de Contabilidad.

Mr. Vicente Rodríguez Colléll, Auditor ROAC, RC Asesores Legales y Tributarios.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

No other requirements are described.

OUTCOMES

2206 - M.U. en Contabilidad, Auditoría y Control de Gestión

- Students should apply acquired knowledge to solve problems in unfamiliar contexts within their field of study, including multidisciplinary scenarios.
- Students should be able to integrate knowledge and address the complexity of making informed judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities associated with the application of their knowledge and judgments.
- Students should communicate conclusions and underlying knowledge clearly and unambiguously to both specialized and non-specialized audiences.
- Students should demonstrate self-directed learning skills for continued academic growth.
- Students should possess and understand foundational knowledge that enables original thinking and research in the field.
- Have critical and self-critical capacity.
- Capacidad de búsqueda de información, análisis y síntesis.
- Capacidad de adaptación a nuevas situaciones y de resolución de problemas.
- Capacidad de organización y planificación del trabajo y los recursos.
- Ser capaces de entender la información financiera empresarial individual y consolidada en España y conocer el efecto que sobre la información financiera tiene la diversidad contable internacional. Interpretar adecuadamente las fortalezas y debilidades de las empresas partiendo del estudio de la información financiera y del entorno en el que opera la empresa. Realizar diagnósticos financieros. Presentar un informe profesional partiendo del análisis de la situación financiera de las empresas españolas. Saber utilizar los estados financieros emitidos por las empresas para tomar decisiones económicas en una amplia variedad de situaciones referidas a su negocio.

LEARNING OUTCOMES

As learning outcomes of this subject, the student will be able to:

- Know and apply national and international accounting regulations affecting corporate groups.
- Know and apply the accounting treatment of business combinations as mergers, acquisitions and spin-offs in accordance with national and international regulations.
- Know and understand the economic implications of different ways of accounting for the different economic developments concerning the consolidation and business combinations.
- Interpret the institutional and economic context that has developed accounting rules to apply to the cases and, where appropriate, to extrapolate to different casuistry that may arise in the future.

DESCRIPTION OF CONTENTS

1. Business combinations

1. Concept and types of business combinations.
2. Accounting policies.
3. Business combinations and accounting information

2. Acquisition method

1. Acquirer.
2. Acquisition Date.
3. Cost of business combination.
4. Recognition and measurement of identifiable assets acquired and liabilities assumed.
5. Determination of the amount of goodwill or negative difference.
6. Provisional Accounting.
7. Business combinations stages.
8. Reverse acquisitions.

3. Mergers

1. Concept, legal requirements and effects of mergers.
2. Process steps and calculations involved.
3. Accounting for mergers.
4. Treatment of cross-shareholdings.
5. Mergers under common control.

4. Other forms of corporate restructuring: Demergers.

1. Concept and types of excision.
2. Procedures, rules and methods.
3. Valuation and accounting.

5. Groups of companies and consolidation.

1. The concept of group of companies: the subjects of consolidation.
2. Standards for the preparation of the consolidated financial statements.
3. Other types of companies: joint ventures and associates
4. Obligation to prepare consolidated accounts and exceptions.
5. Set consolidated and consolidated.

6. Methods of consolidation and equity method.

1. Consolidation process.
2. Consolidation method: Phases and eliminations.
3. Proportionate consolidation method.
4. Equity method.

7. Changing investment and/or percentage of participation.

1. New investments in a subsidiary.
2. Proportional subscription in a capital increase.
3. More than proportional subscription in a capital increase.
4. Increase the percentage without additional investment.
5. Loss of percentage due to the share sale.

8. Indirect control and reciprocal investments.

1. Indirect controln.
2. Elimination-equity investment stages.
3. Acquisition of shares of the parent company.
4. Cross shareholdings among subsidiaries.

9. Annual accounts in foreign currency

1. Functional currency and repiorting currency.
2. Conversion of financial statements in foreign currency.
3. Conversion of financial statements in hyperinflationary economies.

**10. Tax effect on consolidated financial statements.**

1. Taxation for corporate groups.
2. Tax effect on consolidated accounts of individual taxation.
3. Tax effect on tax consolidation regime.

WORKLOAD

ACTIVITY	Hours	% To be attended
Theory classes	45,00	100
Attendance at events and external activities	11,00	0
Development of individual work	5,00	0
Study and independent work	5,00	0
Readings supplementary material	1,00	0
Preparation of evaluation activities	3,50	0
Preparing lectures	21,00	0
Preparation of practical classes and problem	21,00	0
TOTAL	112,50	

TEACHING METHODOLOGY

MD1 - Group learning with the teacher. We use the model masterclass in lectures, offering the possibility to influence the most important of each theme, master exposure time, and present a specific way of working and dealing with different concepts. The participatory model will also be used in some theoretical issues and especially in practical classes, which is to prioritize communication between students and the teacher. The practical sessions will take the case method as a model because it encourages student participation both individually and as a group.

MD2 - Individual study. The student is directed in learning-oriented activities, so that student activity focuses on research, location analysis, handling, processing and return of information. The preparation work for the study of the subject will focus on it.

MD3 - Tutoring. Both individually and in groups to solve problems and direct jobs. You can use the platform "Aula Virtual" of the University of Valencia to maintain contact with the teacher.

MD4 - Group work with peers. The performance of work aims also to motivate the student in the research activity, apprehension and analysis of information, foster personal relationships, share problems, initiatives and solutions to work together. You will need to submit the proposed class work.

EVALUATION

The assessment systems for each part of the subject and their weighting are as follows:

SE1 - Class participation (individualized assessment activities, problem solving, presentation of works, among others): weighting 20%.

SE3 - Exam or test equivalent theoretical-practical character: weighting 80%. To pass the course, you must obtain a grade of at least 5 points on the exam.

Due to their characteristics, continuous assessment activities are not recoverable in this subject.

**ADDENDUM COVID-19**

This addendum will only be activated if the health situation requires so and with the prior agreement of the Governing Council

The teaching of the course 2020-2021 developed in the previous sections of this syllabus is programmed in person.

This addendum includes the specific adaptations that will be applied as a consequence of the adaptation to a partial (hybrid) or total non-classroom teaching model, for supervening and justified causes. It is intended that teaching be taught with the maximum possible presence that the existing scenario allows at any time. Teachers will communicate more specific and detailed information in each subject in the virtual classroom.

1. Contents.

The contents programmed in the syllabus are maintained.

2. Workload and temporary planning of teaching.

The total workload is maintained in hours, programmed in the syllabus. However, the teaching staff can make modifications to the activities initially scheduled, informing the student of the restructuring carried out.

Regarding the temporal planning and the organization of the class sessions, as far as possible the temporal programming of the subject will be adjusted to the established schedule, so that the face-to-face and synchronous non-face-to-face teaching will be taught on days and fixed hours, in the assigned classroom or in the published virtual room. Asynchronous non-classroom teaching may imply an increase in the autonomous work of the students.

3. Teaching methodology.

The teaching methodology will be adapted in a flexible and diversified way, depending on the teaching modalities adopted - face-to-face, synchronous no-face or asynchronous no-face. The teaching resources and technological platforms provided by the Universitat de València will be used, such as videoconferences through tools such as Blackboard collaborate (BBC) or similar (available in virtual classroom), and / or recorded transparencies, among others. The tutorial attention will be carried out virtually, informing the teachers of the contact channel.

4. Assessment.

The assessment methods and formats, in coherence with the adopted teaching modalities and methodology, can make special emphasis on continuous assessment. The teacher will specify in the virtual classroom if there are changes in this regard due to unforeseen circumstances, as well as the modes of delivery and review / return, preferably online, of the scheduled work.

The assessment is scheduled in person. Even in a non-face-to-face teaching model, the face-to-face final assessment will take precedence to the extent permitted by regulatory compliance established by the health situation. If the assessment cannot be in person due to exceptional circumstances, the teacher will specify in the virtual classroom information about the online test, which will be carried out with attendance control of the student body with camera and recording for the identification of the student, with prior consent student express.
