

COURSE DATA

Data Subject	
Code	44661
Name	Seminars
Cycle	Master's degree
ECTS Credits	5.0
Academic year	2023 - 2024

Study (s)

Degree	Center	Acad. Period year
2221 - M.U. en Ciencia de Datos	School of Engineering	2 First term

Subject-matter

Degree	Subject-matter	Character
2221 - M.U. en Ciencia de Datos	13 - Seminars	Obligatory

Coordination

Name	Department
SORIA OLIVAS, EMILIO	242 - Electronic Engineering

SUMMARY

In this subject, different specialists will give 5-hour modules in which they will explain the most current aspects of Data Science in order to provide students with a current approach to this discipline.

PREVIOUS KNOWLEDGE

Relationship to other subjects of the same degree

There are no specified enrollment restrictions with other subjects of the curriculum.

Other requirements

OUTCOMES

2221 - M.U. en Ciencia de Datos

- Students should be able to integrate knowledge and address the complexity of making informed judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities associated with the application of their knowledge and judgments.
- Students should demonstrate self-directed learning skills for continued academic growth.
- Be able to assess the need to complete their technical, scientific, language, computer, literary, ethical, social and human education, and to organise their own learning with a high degree of autonomy.
- Capacidad de análisis y síntesis, en la elaboración de informes, en la exposición, comunicación y defensa de ideas.
- Ser capaces de asumir la responsabilidad de su propio desarrollo profesional y de su especialización en uno o más campos de estudio, aplicando los conocimientos adquiridos en la identificación de salidas profesionales y yacimientos de empleo.
- Entender la utilidad de la ciencia de datos y sus elementos asociados, así como su aplicación en la resolución de problemas, eligiendo las técnicas más adecuadas a cada problema, aplicando de forma correcta las técnicas de evaluación y, finalmente, interpretando los modelos y resultados.
- Saber realizar las labores propias de su profesión incluyendo, entre otras, la adquisición y clasificación de datos de forma eficiente, aplicación de las técnicas de análisis de datos avanzado para llegar a la extracción de información (científica, de mercado, etc.) a partir de los mismos.
- Seleccionar, atendiendo a criterios de eficiencia, escalabilidad, tolerancia a fallos y adecuación al entorno de producción el paradigma de datos óptimo en soluciones Big Data. Entender como las técnicas Big Data se utilizan para soportar y realizar la toma de decisiones basadas en datos.

LEARNING OUTCOMES

Know the current trends in data science. Learn what applications in data science are emerging Learn about new techniques/models to analyze the data.

WORKLOAD

ACTIVITY	Hours	% To be attended
Seminars	50,00	100
TOTAL	50,00	

TEACHING METHODOLOGY

English version is not available

EVALUATION

Attendance at the seminars is compulsory at the first call (at least 80%) and will be evaluated with a report of at least 12 pages. In the second call, the student must present training activities equivalent to 50 hours, plus a 12-page report summarizing these activities. These activities must be comparable to the seminars. The student must provide all the necessary information relevant to the assessment of the activity by the CEC and the indications on which his/her application for equalization is based. The similarity between the substitute activities and the seminars will be assessed by the CCA.
