<b>Degree</b>	<b>Subject-matter</b>	<b>Character</b>
2234 - M.U. en Tecnol. Web,Computac. Nube y Aplicac. Móviles 17-V.1	5 - Production of software, security and profession	Obligatory

**Coordination**

<b>Name</b>	<b>Department</b>
GUTIERREZ AGUADO, JUAN	240 - Computer Science

**SUMMARY**

This subject is structured around seminars/conferences that will be conducted by professionals of recognized prestige who apply TI solutions in different fields. In this way, the student is expected to understand what techniques, approaches, solutions, methodologies, fundamentals, etc. are used by professionals to offer solutions in multidisciplinary fields.

**PREVIOUS KNOWLEDGE****Relationship to other subjects of the same degree**

There are no specified enrollment restrictions with other subjects of the curriculum.

### Other requirements

Specific requirements for this subject are not considered.

## OUTCOMES

### 2234 - M.U. en Tecnol. Web, Computac. Nube y Aplicac. Móviles 17-V.1

- Students can apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study.
- Students are able to integrate knowledge and handle the complexity of formulating judgments based on information that, while being incomplete or limited, includes reflection on social and ethical responsibilities linked to the application of their knowledge and judgments.
- Students can communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and non-specialist audiences, clearly and unambiguously.
- Students have the learning skills that will allow them to continue studying in a way that will be largely self-directed or autonomous.
- Students have the knowledge and understanding that provide a basis or an opportunity for originality in developing and/or applying ideas, often within a research context.
- Ability to apply acquired knowledge and solve problems in new or little-known environments within broader and multidisciplinary contexts, being able to integrate this knowledge.
- Capacity for the elaboration, planning, direction, coordination, technical and economic management and the implantation of Web projects.
- Ability to understand and apply ethical responsibility, legislation and professional ethics in the professional practice.
- To foster, in academic and professional contexts, technological, social or cultural advancement within a society based on In knowledge and respect for: a) fundamental rights and equal opportunities between men and women; b) principles of equal opportunities and universal accessibility of persons with disabilities; and, c) the values &#8203;&#8203;of a culture of peace and democratic values.

## LEARNING OUTCOMES

- Specify and complete computer tasks that are complex, incompletely defined or unfamiliar
- Describe and explain techniques and methods applicable to their particular area of study and identify their limitations
- Organize your own work independently, demonstrating initiative and exercising personal responsibility
- Perform bibliographic searches and reviews using databases and other sources of information
- Learning and improving personal performance as the basis for lifelong learning and professional development
- Communicate effectively both verbally and through other media to a variety of audiences and preferably in a second language
- Appreciate the skills required to work with and lead a team that can consist of different disciplines and different levels of qualification
- Demonstrate awareness of the need for ethical professional conduct in computer science
- Demonstrate awareness of issues at the frontier of their expertise and assess their impact
- Identify appropriate legal, commercial, industrial, economic and / or social contexts for their area of study and explain their relevance
- Acquire the personal skills that facilitate the insertion and professional development

## DESCRIPTION OF CONTENTS

### 1. Thematic areas:

Current IT regulations and their practical application.  
 Methodologies and tools used in the business field.  
 Development and implementation of large projects.  
 Solutions in multidisciplinary fields: bioinformatics, medicine, computer animation, physics, etc.

## WORKLOAD

ACTIVITAT	Hours	% To be attended
Theoretical and practical classes	20.00	100
Study and independent work	30.00	0
<b>TOTAL</b>	<b>50.00</b>	

## TEACHING METHODOLOGY

- Theory class
- Problem resolution
- Project-oriented learning

---

## **EVALUATION**

Online evaluation and/or degree of participation 30%

Job evaluation 70%

---
